MAYOR'S FOREWORD

that it fulfils its mandate as enshrined in the constitution of the Republic of South Africa, Act 108 of 1996, it needs a mechanism to identify its priorities, issues and problems. The municipality has engaged in a strategic planning session, at which the mission, vision and strategic objectives were reviewed and retained. This process of planning is guided by two key national objectives:

- ❖ The need to set out the core principles, mechanisms and process that give meaning to development, local governance and to empower the municipality to move progressively towards the social and economic upliftment of communities and the provision of basic services to all communities.
- ❖ The local government must involve the active engagement of communities.

This process, which in a way facilitates planning and delivery, should arrive at decisions on such issues as municipal budgets, local economic development and institutional transformation in a consultative, systematic and strategic manner.

The 2022/23 financial years' budgeted and processes have been largely affected by the COVID-19 pandemic. This has necessitated the reprioritization of projects and programs, to fund COVID-19 related activities, for example – buying water tankers (mobile and fixed) to supply water throughout the municipal area. However, there has been some notable progress in terms of projects.

The civic center building which has been standing for the past years, has been completed. This particular project has saved the municipality a lot of money which used to be spent on office rental. This will help improve coordination within the municipal functions, as the essential staff has been relocated in one central building. Also completed, is more 5.1 km of a road at the Makoxa village.

On the sporting front, I wish to state that the most talked about Mageva stadium is complete. However there has been some challenges on the completion of some projects.

There has been a big milestone as more than 2000 households have been electrified. As there has been a big outcry concerning darkness in villages, which were considered crime hotspots, all villages have been provided with high masts. Majority of them have already been energized.

It is pleasing to highlight that our relationship with the national government has yielded positive results of relieving the headache the municipality has been having regarding two major roads' projects – connecting more than 15 villages, albeit on separate ways. The roads are as follows:

- 29 kilometers from Mageva to Makhuva

- 32 kilometers from Thomo to Hlomela

Since the inception of democracy in 1994, the municipality has been facing a backlog of residential sites. It is my pleasure to highlight the community that a tittle deed has been secured. This has allowed the municipality to demarcate 539 sites which are ready for disposal to the community.

Despite financial constraints and the adverse situation presented by the COVID-19 pandemic, the municipality is soldiering on and hope to complete all the current projects. We are saying all this, while knowing fully well the various service delivery challenges the Greater Giyani community is experiencing.

For the Greater Giyani Municipality to ensure:

The community's positive involvement in the processes of the municipality, we hope to achieve more.

Cllr. ZITHA.T
Mayor

Municipal Manager

MUNICIPAL MANAGER'S FOREWORD

The current COVID-19 pandemic has had a grossly negative impact on the operations of the municipality. This as most of the staff members had to be temporarily stayed home, in accordance with the protocols of the lockdown regulations. Currently, the municipality is operating with minimal staff. This has a very negative impact on service delivery. However, the municipality is soldiering on.

In order to comply with the legislation governing municipal operation, we have managed to approve the IDP and budget for the 2021/22 and two outer years. The process was done under stringent conditions, as the related processes were undertaken during the lockdown period.

It is pleasing to note that the kind of relationship prevailing between management and staff is warm and cordial, which is conducive to the staff's high moral, and also enhances the best service delivery process. Also encouraging, is the best relationship which has been experienced between management and labor. Because of this, we have not experienced a single labor protest across the financial year.

Also on the plus side for the municipality is that all directors' positions have been filled. This I hope will go a long way in improving the audit outcome – hopefully from qualified to clean audit.

I'm pleased to highlight that as administration, we have been able to support our political principals to achieve a remarkable service delivery record.

In conclusion, I wish to state some of the projects which have been completed in the current financial year.

- Waste disposal site under the Mabunda traditional authority.
- Upgrading from gravel to paving at Giyani Section F.
- Upgrading of grading of a road between Nkomo A to B.
- Completion of the Homu 14B sports center.

We are currently in the process of selling more than 500 residential sites to the community under the Greater Giyani municipal area.

I hope with the greatest hard work and corporation of my staff, we shall achieve the greatest service delivery heights.

Kind regards.

M.M Chauke
Municipal Manager

Executive Summary

The Integrated Development Plan of the municipality has been developed within an approved IDP framework and process plan 2022/23. The framework indicates legislation requiring the development of the IDP and sector plans, stakeholders' roles as well as responsibilities, timeframes and activities to be undertaken.

Legislative framework

- Constitution of South Africa act 108 of 1996
- Municipal systems act 32 of 2000
- Municipal structures act 117 of 1998
- Municipal finance management act 56 of 2003
- National spatial development perspective
- Limpopo employment growth and development strategy
- National environmental management act
- Spatial planning and land use management act
- Green Paper on Development and Planning
- National Biodiversity Act 2004 (act. 10 of 2004)
- Waste Management Act (Act 59 of 2008)
- Water Service Act (Act 108 of 1997)
- Local Agenda 21
- World Summit on Sustainable Development.
- KYTO Protocol
- CITES (Convention on international trade and endangered species)
- RAMSAR

The process plan further outlines the phases of the IDP and the development process. Phases of the IDP were developed as follows:

Analysis Phase: The municipality engaged in an intense strategic planning process, where a comprehensive analysis of the municipality was done, this resulted in the identification of challenges in all performance areas.

Strategy Development Phase: This phase outlines the establishment of the **SWOT** analysis, review and development of strategic objectives and development of strategies. The latter mentioned issues were also dealt with in the strategic planning session. The vision and mission were reviewed in the 2020 strategic session.

Project Development Phase: The project development phase outlines the development of projects. The projects emanate from the challenges identified during the strategic planning and public participation sessions. The projects were developed in such a manner that they also addressed national and provincial priorities. Each project has cost estimation, time frames, sources of funding and beneficiaries. Projects were also developed per KPA.

Operational plan: SDBIP: This chapter outlines a one year (2021/22) operational plan of the municipality. The plan only takes into consideration the projects and programs with financial and human resource support. The SDBIP indicates when, how and who will be responsible for implementing each project and program. The SDBIP addresses all projects and programs in the projects phase.

Financial Plan: This chapter outlines the financial position of the municipality, its Mid-year performance budget, the planned budget for 2021/22. The Mid-year Budget performance influences the compilation of the following financial year.

Integration phase: this phase demonstrates integrated planning of sector plans that ensures that projects are aligned for efficient and effective service delivery.

Table0: Structures which drive the IDP

Role-player	Roles
Executive Committee	Participate in the drafting and approval of IDP Process Plan and the chairperson of the Planning and Development portfolio committee chairs the Representative Forum meetings.
Portfolio Committee	<ul style="list-style-type: none"> • Analyze and ensure that the IDP document addresses issues raised • Assist in setting of targets for projects implementation in their Clusters committees' meetings
Ward Councilors and their Committees	<ul style="list-style-type: none"> • Participate in the Rep Forums and collect information from the community for inclusion in the IDP. • Disseminate information to the community about the developmental issues as contained in the IDP and • Participate in the project implementations at their specific wards

Role-player	Roles
Municipal Manager	Monitor and oversee the overall IDP planning and implementation process
Line function managers	<ul style="list-style-type: none"> • Participate in the steering committees' meetings and Rep forums. • Provide technical/sector expertise
IDP Manager	<ul style="list-style-type: none"> • Is the secretary of the IDP Steering Committee, • Coordinate the overall IDP planning and implementation process. • Monitor the overall IDP planning and implementation process.
Sector departments (province & national)	<ul style="list-style-type: none"> • Provide data and information for better planning & alignment • Provide information about project to be implemented in the municipality as well as the budget allocation • Provide technical and professional support
Mopani District Municipality	<ul style="list-style-type: none"> • Coordinate and align planning activities of locals • Ensure horizontal and vertical alignment
Business sector	<ul style="list-style-type: none"> • Provide information and suggestions about business development.
NGOs & CBOs	<ul style="list-style-type: none"> • Participate in Rep forums meetings • Represent interest and contribute knowledge and ideas
Community members	<ul style="list-style-type: none"> • Participate in their wards by providing information to the ward committees • Participate in local meetings • Provide comments during the IDP advertisement period.

1. Analysis Phase

1.1. INTRODUCTION AND OVERVIEW

1.1.1. Introduction

This chapter provides an overview of the municipality. The Municipal System Act 32 of 2000, requires all municipalities to develop a five-year Integrated Development Plan and review it annually. In principle the IDP is a business plan of the municipality and it has included financial and performance elements. It has been developed within the approved IDP framework and process plan 2022/23.

1.1.2. Overview

The Greater Giyani Municipality is one of five (5) local municipalities falling within Mopani District Municipality in the Limpopo Province. The other four local municipalities are Greater Tzaneen (+/-120km), Greater Letaba (+/-90km), Ba-Phalaborwa (+/-160km) and Maruleng (+/-195km). The town is located +/- 185km from Polokwane, +/-100km from Thohoyandou and +/-550km from Tshwane. The municipality covers approximately 2967, 27km² areas with only one semi-urban area being Giyani. The municipality is demarcated into 31 wards and has 62 councilors. It has 12 traditional authority traditional authorities are in the process of being recognized by office of the premier) areas comprising of +97 villages. Giyani town is the largest center of population concentration, employment opportunities, shopping and recreational facilities.

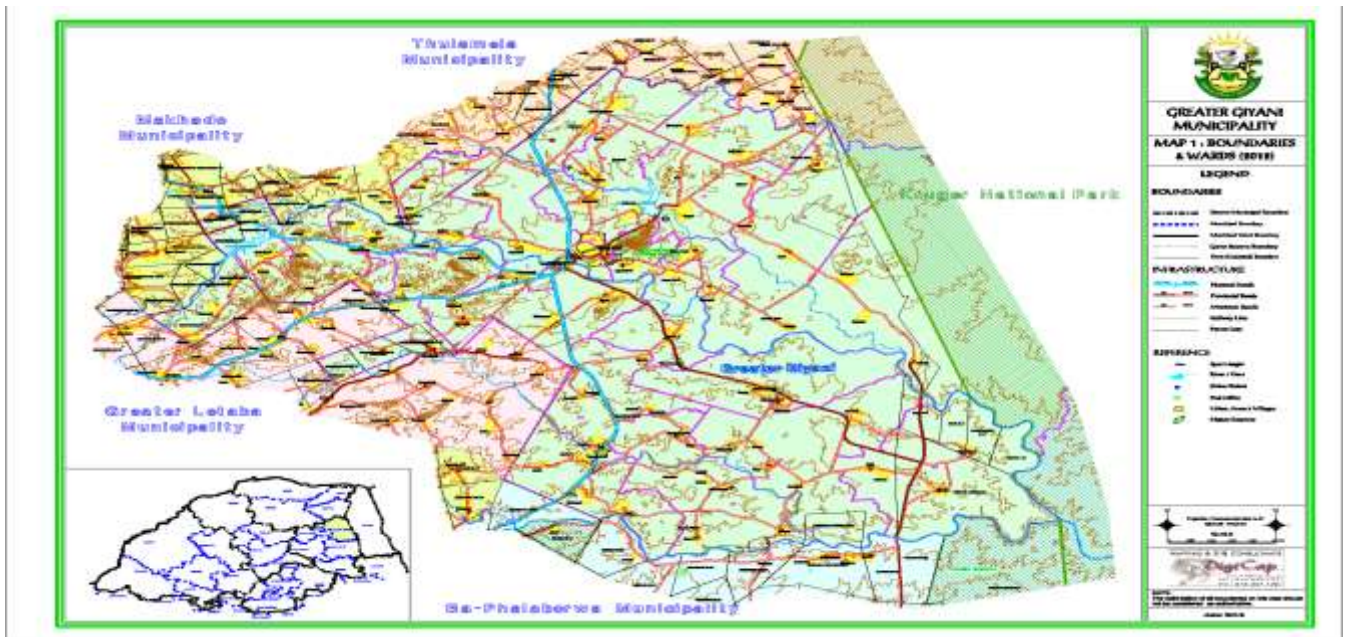

Map 1 below displays the spatial layout of the municipality. Indicating wards boundaries and boundaries which the municipality shares with neighboring municipalities. The new demarcations has the Shingwedzi and bateleur camps with into ward 19; that on its own has cost implications in relation to the provision of services, but on a positive note it provides Giyani to become a strategic stakeholder in the International renown Kruger National park, it is an economic potential that the municipality can take advantage of.

The Map further indicates natural resources such as rivers and mountains. This spatial indication provides guidance in the development of human settlements and Agricultural initiatives.

MAP 1: SPATIAL ORIENTATION OF GREATER GIYANI MUNICIPALITY

Source: Demarcation Board 2020

1.1.3. Total Population

The total population is **256,300** with a total number of households of **70,537**. The municipality has **31 wards** grouped into 5 clusters. In most wards, the population exceeds 5000 people. In the past few years, the population has shown a slight decline. In the 2011 census, the population was counted at **247,565** but according to the 2011 census, it has declined by almost **3000** people. The decline may be attributed to migration to other urban centers, such as Polokwane, Gauteng and Tzaneen in which the migrants search for better working conditions. **(2016cs)** The information above is supposed to be reviewed this year 2022 because statistics south Africa will be conducting fully fledged census (census 2021)

Table 2: Total population per ward

Ward	Male	Female	Total

1.1.4. Population per Gender and Age

There are various factors contributing to the age group population patterns, such as mortality rate, migration and death. The table below depicts that from the age group 0-4, 5-14 and 15-34. The population patterns do not differ much. In the age groups 35-64 and over 65, there is a clear decrease in population growth patterns, with females exceeding males.

Table 3: Population per age and gender

Estimated Population for Greater Giyani , 2011& 2016)by Gender and Age						
	Gender	2001	%	2011	%	2016
0-4	Male	15135	49.3	13559	49.7	16436
	Female	15566	50.7	13725	50.3	12151
5 to 14	Male	34728	49.3	35850	49.5	16424
	Female	35692	50.7	36509	50.5	17964
15 to 34	Male	32123	44.1	37640	44.4	18749
	Female	40659	55.9	47117	55.6	18749

Total	All	216377	100	244 217	100	256 300

(STATSA, 2016)

1.1.5. Level of Education

The majority of people in the age groups 5 to 24 years, did attend school in 2011 (74.4%). It is indicated that 22.6% of the population in this age bracket, does not attend any educational institution; possible factors contributing to this may be accessibility of schools and affordability of higher learning institutions.

Table 4: Educational Institutions being attended

Persons	2016	%
None	29217	22.6
Pre-school	2773	2.1
School	95970	74.4
College	635	0.5
Technikon	134	0.1
University	73	0.1
Adult Education Centre (ABET)	113	0.1

Other	106	0.1
Total	129021	100

(Census 2011)

Table 4) presents statistics on the highest level of education attained by persons older than 20 years, between 2011 and 2016. It indicates that the population with no schooling decreased from 47.6% to 42.1% in 2001. The percentage of the population with an educational level higher than Secondary school increased from 4.7% in 1996 to 7.4% in 2001 with the actual number almost doubling during this period. A factor that may contribute to the lower percentages on higher learning institution is the capacity and the variety of qualification offered by our local institutions.

1.1.6. Employment Profile

Table 7 indicates that the number of unemployed people has increased from 20 534 (50.7%) in 2011 to 31 636 (60.4%) in 2016. Unemployment has a negative impact on society which might eventually result in an increase in crime, grant dependency, and non-payment of services.

Table 5: Labor Force

Persons	2011	%	2016	%
Employed	19979	49.3	20759	39.6
Unemployed	20534	50.7	31636	60.4
Total Labour Force	40513	100	52395	100
Not economically active			75829	

Source: Demarcation Board, 2020

Table 6: Labor Status

	Male	Female
Employed	16206	17360
Unemployed	10919	16178
Not economically active	31701	44720
Not applicable	2247	1833

Source: Statssa 2016

Table 6 indicates that most females are employed than males; this may be a result of job opportunities within the municipality. This might also be due to the effort done to address gender equity in labor intensive work opportunities such as construction and mining.

1.1.7. Household Income

The average income for all members of community within Greater Giyani can be categorized as presented in Table 9. The percentage of people earning no income decreased from 82.34% in 2011 to 78.04% in 2016. The percentage of people earning less than R400 per month did increase tremendously (the number of persons doubled from 5764 in 2011 to 18631 in 2016) and there was a decline in those earning between R401 and R800 per month. The high statistic of low earning people may be in relation to the employment industry. Agriculture in general, employs more people,

but with the lower wages. People that are earning higher incomes are professionals which are usually fewer in number.

Table 7: Population by Individual Monthly Income, Greater Giyani, 2011 & 2016

Persons	2011	2016

1.2 Analysis of Key Performance Areas (KPA's)

1.2.1. KPA 1: SPATIAL RATIONAL

1.2.1.1 Purpose of Spatial Analysis and overview

The spatial analysis provides a visual picture of existing spatial patterns, e.g. eco-system, environmental sensitive areas, growth points, population concentration areas, land claims and their socio-economic implications. All these aspects have a bearing on future land usage, infrastructure investment, establishment of sustainable human settlement and local economic development.

The municipality shares borders with two local Municipalities within the Mopani District and another two in the Vhembe district. It is demarcated into thirty (31) wards consisting of ninety one (95) villages, three (3) RDP towns, a proclaimed township with seven sections which include the Central Business District (CBD). There is a visible network of streams and rivers, a considerable percentage of land for grazing, subsistence farming, dilapidated irrigation schemes and natural resources (Mopani Worms & Marula Fruits). A significant area of land owned by the state is under the custodianship of traditional authorities. Large tracts of high potential agricultural land are being utilized for intensive and/or extensive farming activities. There is an influx of people to the Giyani town, which is perceived to offer employment opportunities and basic services. There is an informal settlement of Mozambican immigrants and South African nationals in the eastern portion of Giyani (Hluphekani), which lacks basic services (roads, water, electricity).

The CBD is locked in the Tribal Authority land. As a result, the town is growing inwards. There are visible unstructured developments which impact negatively on the image of the town. There is a need to revitalize the town and develop incentive policies to attract investment. With the current disputes between traditional leadership hampering significant development the municipality need to intensify negotiations with the relevant traditional leaders to release land for development.

1.2.1.2 Settlement Patterns

Giyani population is concentrated in 95 rural villages and 7 sections of the township. The Giyani spatial economic development patterns are marked by apartheid legacy with the majority of people confined to rural areas with limited economic activities and access to urban infrastructure.

Rural communities are situated far apart, which makes infrastructure development expensive. Villages are an average distance of 35 kms away from the CBD and most roads are gravel. In rainy seasons, the roads are not easily accessible, which affects service, most importantly, emergency services.

1.2.1.3. Hierarchy of settlements

Table 9: Hierarchy of settlements

TYPE	AREA
First order	Giyani Section A, B, D, E and F
Second order	Dzumeri, Shawela, Nkomo, Risinga and xikukwani villages.
Third Order	All other villages

1.2.1.4. Land Claims and their socio-economic implication

Approximately 18,633 hectares of land is under claim which poses a very serious developmental challenge. On the other hand, land redistribution processes may result in many people obtaining access to land, resulting in improved quality of life. It could also result in a large-scale sterilization of economic productive land, e.g. agricultural land and mining. This might lead to job losses if not well managed. Our LED strategy is anchored in two pillars agriculture and tourism of which both requires land for development.

1.2.1.5. Land Reform

According to the land claims commission, more than 44 land claims were received from Greater Giyani. However, upon investigation, it was discovered that only 11 of them were found to be valid. The rest are still being validated. **(DRDLR land claims section 200).**

Eight land claims have already been fully settled and their communities, which include Hlomela, Siyandhani, Shimange Risinga and recently Muyexe, Ndindani Nwazekudzeku, Nwamankena and Dzumeri communities have benefit in terms of their settlement agreements.

Challenges that the Land Claims Commission is faced with are as follows: -

- Counter claims or overlapping of claims.
- Validity of chieftainship.
- Land owners challenging the validity of the claims.

- New land owners not having the expertise to continue with the production and running of the farms commercially.
- Capacity of staff to deal with all claims at once.
- Negative media reporting.
- Illegal land looting.

1.2.1.6. Illegal land occupation and informal settlements

Giyani has 16 informal settlements which are spread across the municipal area. They are both on municipal and traditional land. Informal settlements have a negative impact on planning, provision of services and attraction on investment the map below highlights some of the challenges with regard to informal settlements.

Map 2: informal settlements on proclaimed land

(Source: GGM LUS)

Map 2, indicates an example of encroachment of informal settlements on proclaimed land. There is a need for the municipality to identify land and township establishment for the relocation of informal communities. There is a need of the enforcement of by-laws as well as the application of the land Use Management Scheme. The LUS is currently under review and will be adopted this financial year.

1.2.1.7. SDF and LUS

The municipality has reviewed its SDF and has been adopted in the current calendar year. There is a need to review the SDF to ensure that the following are indicated:

- Environmental Sensitive areas (Flood lines, mineral)
- Climate and soil potential in relation to potential crops
- Urban line
- Potential land for development and growth of the town.
- Alignment of SDF and LUS

The SDF, also clearly indicates the development nodes of the municipality. It goes further to indicate the level of services around Giyani as well as shows the mineral belt.

During a strategic planning session held in December 2021, the planning tools were noted as critical:

- Geographic Information System (GIS)
- Land Use Scheme (LUS)
- Spatial Development framework (SDF)
- Information Management Systems (IMS)

The LUS indicates land uses within the municipality, layout patterns of all villages and townships, as well as the encouragement of informal settlements on proclaimed land (Map 2) and parks. One challenge within the LUS was open spaces which have not been designated.

1.2.1.7.1. Review of LUS

The municipality has reviewed its land use scheme to determine various land uses

- Land ownership right must be determined.
- Public participation must have been done.
- Applicable legislation.
- Recognition and inclusion of existing land uses

The municipality has met all the above requirements except that the scheme is yet to be promulgated. The promulgation of LUS is stalled by challenges of open spaces within proclaimed areas as indicated in Map 3 below.

Map 3: proclaimed areas with open spaces

Source: GGM LUMS

1.2.1.8. Strategic Land for development

The GGM Spatial Development Framework (SDF) and LUS guide development in the municipality. It is a framework that ensures that development is cost effective and sustainable. Sustainable development looks into bringing human settlements to the economic activities and ensuring that development does not compromise the environment. Map 4 displays strategic land for the development as elaborated below.

1.2.1.8.1. Strategic Land for residential development

The land which is situated north of R81 road from Giyani to Polokwane is strategically located for residential purposes in line with the government objective of creating sustainable integrated human settlements. The land will accommodate high, medium and low-income earners as per map 3 below. Giyani golf course is amongst the pieces of land the municipality is earmarking for rezoning and subdivision for high end residential properties but maintaining the current golf course.

1.2.1.8.2. Private/Tribal Authority land for development

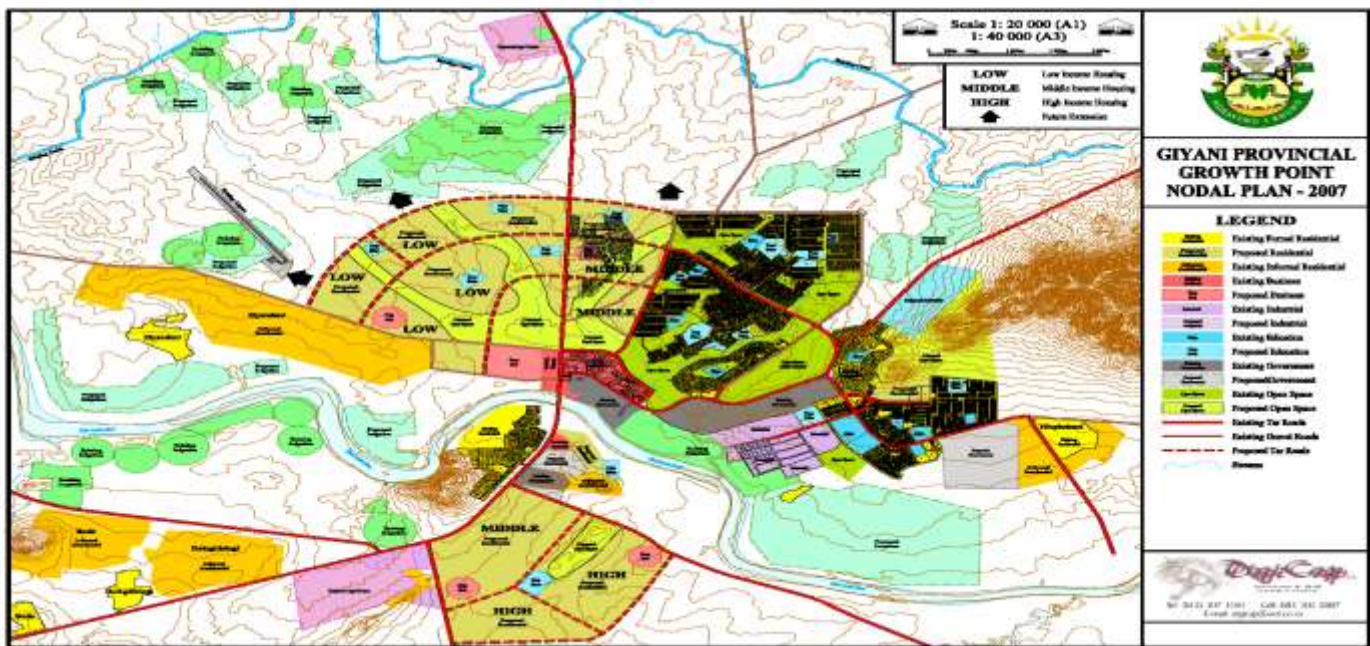

The land which is situated adjacent to the CBD is strategically located for both residential and business purposes. The municipality is in the process of developing the infrastructure master plan which will assist to develop the land. Currently negotiations are going on between the municipality and traditional leaders for the release of land which is suitable for development. (see the attached map 3 below)

1.2.1.8.3. Government land suitable for development.

The municipality has earmarked the land which is situated east of the R81 road to Polokwane and north of the R71 road to Tzaneen next to area commissioner's office for business development as per our spatial development framework. (see the attached map 3 below.)

1.2.1.8.4. Ideal land for industrial development

Strategic Land of industrial development is located along R81 to Malamulele with envisaged growth to be towards the west. The area is ideal since it is not within environmental sensitive areas such as water bodies and minerals. Private land developers are showing interest in the development of the land towards Malamulele road however infrastructure in the form of bulk water, electricity needs to be upgraded to attract serious development.

Map 4: Strategic land for Development

Source: GGM Land Use Schemes

1.2.1.9. The Environmental analysis

In terms of the National Environment Management Act (NEMA), people must be placed in a healthy environment. There is a need to determine flood lines within the municipal area in order to minimize potential risks and disasters.

The following are some of the environmental factors which need to be considered:

- Climate
- Geology
- Terrain
- Hydrology
- Soil potential and agriculture
- Tourism and conservation

a. Climate

The climate of Giyani is characterized by low rainfalls with a very hot summer. This could be caused by its position in the Lowveld. The municipal area received between 200 – 400ml of rain annually. The general rainfall has a direct impact on development, especially on agriculture. This results in the shortage of surface water, leaving the municipality to rely on ground water.

b. Geology

The Greater Giyani Municipality is characterized with different types of soil and also there is a mineral belt which passes from the western part to the eastern part of the municipal area towards the Kruger National Park. There are 24 disused mines in the whole area with gold as the dominant mineral, as well as a little deposit of cilica around the Muyexe area. Council for geo science is currently reviewing the information and conducting studies to determine the availability of mineral resources.

c. Terrain

Greater Giyani is a low-lying area with the abundance of Mopani and Marula trees. It is mainly grassland which is often overgrazed due to overstocking.

d. Hydrology

All rivers (Middle Letaba, Nsami and Molototsi) are mostly perennial. All the rivers feed into the Letaba River in the south. Other rivers such as Malatsi, Mbaula and Molototsi are tributaries of the Greater Letaba River.

e. Soil potential and Agriculture

The municipality has soil which is suited for arable land and for agricultural purposes. The majority of the land around the municipal land falls under the local traditional authorities. Commercial farming occurs at a lesser scale only to be superseded by subsistence farming. The rest of the land is used from communal grazing.

f. Tourism and conservation

The municipal area has two proclaimed nature reserves, Mbawula ranch and Man’ombe nature reserves, they are both state owned. The reserves are mainly offer opportunities to tourist for activities like hiking, trail, hunting and game drives.

The following are environmental challenges identified in GGM:

Table 10: Environmental challenges

<u>Air Pollution</u>	<u>Water Pollution</u>
Air pollution is an environmental problem which affects mainly the Giyani Town due to the concentration of vehicles and small industries (factory units), and the illegal burning of garbage at the current dumping site.	Water pollution in the Greater Giyani Municipality is a serious problem. Water is polluted by littering and the overflow of sewage, creating serious health problems for people who depend on water from rivers and streams. Informal businesses, conducted alongside the road to Moeketsi – Malamulele, worsen the problem by illegal dumping in the Klein Letaba River along the Ngove, Nkomo and Homu villages.

<p><u>Deforestation.</u></p> <p>Deforestation affects most of the Greater Giyani municipal area. Firewood collectors, farmers, villagers, traditional healers, and herbalists aggravate the problem. The problem of deforestation is worse around major routes and villages.</p>	<p><u>Veld and Forest fires</u></p> <p>Veld and forest fires are experienced in the whole of Greater Giyani Municipality. The magnitude of the problem is severe. The major causes of this problem is poaching, firewood collection, uncontrolled burning of forests. Veld fires are prevalent in winter or early summer and affected areas include grazing land and the Man'ombe Nature Reserve.</p>
<p><u>Soil Erosion</u></p> <p>Soil erosion is a problem in Greater Giyani municipal area especially around rural villages. The major causes of soil erosion are veld and forest fires, deforestation through wood gathering, overgrazing and poor land use planning and management.</p>	<p><u>Informal settlements</u></p> <p>Informal settlements have major negative effect on the environment in that whenever it occurs, natural vegetation is destroyed worsening problems such as deforestation, soil erosion, water and air pollution e.g. Hluphekani in the eastern part of Giyani Town, Matshamahinkanu (between Sections E and F), the squatter camp in Section A. The major causes of informal settlements are influx of people from villages to the town due to poverty, unemployment, population growth and urbanization.</p>
<p><u>Overgrazing</u></p> <p>Overgrazing is another environmental problem which is rife in the Greater Giyani Municipality. The contributing factor is the unscientific stock farming which at the end exerts pressure on the grazing land.</p>	<p><u>Wetlands</u></p> <p>The wetland are unprotected, and as a result people occupy them illegally. Also, there is a great deal of illegal dumping in the wetlands.</p>

Table 11: Environmental SWOT Analysis

Strengths	Weaknesses	Opportunities	Threats
<ul style="list-style-type: none"> • Environmental by-Laws • -Land-care projects • LEDET and DEA are supportive of the municipal environmental management. • he greenest municipal competition 	<ul style="list-style-type: none"> • Non-rehabilitated excavated areas • Declining biodiversity • Lack of capacity in the Disaster unit • Lack of capacity to enforce by-laws • Unmonitored veld fires. 	<ul style="list-style-type: none"> • Proximity of environmental experts in the Kruger National Park • Proximity to Mopani District • Less Industrious area • environmental specialist in the municipality 	<ul style="list-style-type: none"> • Reduction of grazing land • Reduction of arable land • Increased occurrence of mosquitoes • Droughts and floods • Fire station not well resourced-Fire station • climate change • Natural disasters, eg. • Flooding, drought. • Covid 19

1.2.1.10. Challenges: Spatial Rational

- Unstructured Development
- Lack of Land Use Management
- Lack of Land Use Policies' application
- Minimum participation by all stakeholders on land use matters and policies
- Lack of compliance by stakeholders
- Lack of Monitoring on land matters
- Lack of alignment of SDF and SPLUMA
- General lack of land for development.
- Chieftaincy disputes.

1.2.2. KPA 2: Institutional development and Transformation

The Greater Giyani Municipality was established in terms of the Constitution Act, no 108 1996, the Demarcation act 27 of 1998 and Section 12 Notice issued in terms of the Local Government: Municipal Structures Act 117 of 1998. The municipality is organized into political and administrative structures.

1.2.2.1. Political Structures

Council has appointed seven full time councilors as follows:

- Mayor
- Speaker
- Chief Whip
- Chairperson infrastructure development
- Chairperson finance committee
- Chairperson corporate governance and shared services
- Chairperson MPAC

1.2.2.2. Portfolio Committees (established by council)

Table 12: Portfolio committees

NO	NAME OF COMMITTEE	DEPT TO SUPPORT	CLUSTER
01	BUDGET AND TREASURY	BUDGET AND TEASURY	FINANCE
02	WATER, SANITATION AND ENERGY	TECHNICAL.	INFRASTRUC TURE

06	CORPORATE AND SHARED SERVICES	CORPORATE SERVICES	CORPORATE GOVERNANC E & SHARED SEVICES

NO	NAME OF COMMITTEE	DEPT TO SUPPORT	CLUSTER
07	SPATIAL PLANNING AND LED	PLANNING AND DEVELOPMENT.	ECONOMIC DEVELOPMENT
08	INFRASTRUCTURE DEVELOPMENT	TECHNICAL SERVICES	INFRASTRUCTURE
09	SPORTS, ARTS AND CULTURE	COMMUNITY SERVICES	SOCIAL

Council also has the following special programs that are located in the Office of the Mayor:

- Gender
- Disability
- Traditional Affairs
- Youth
- HIV/Aids
- Older persons.
- Officials responsible for the coordinating this special program have been appointed and are reporting to the manager in the office of the mayor.

1.2.2.3 MPAC and its functionality

Section 129 of the MFMA requires municipalities to prepare an over-sight report over the annual report and to publish it in the website and also send them to the provincial legislature.

Section 79 of the MSA provides for committees of council reporting directly to the council, in accordance with the terms of reference of such committees as developed by the council. Such committees, because of direct reporting lines to council, are best suited to do oversight in the municipality, not only in terms of oversight report, but general oversight over both the administrative and executive authority of the municipality.

The Greater Giyani Municipality has established the MPAC and a chairperson has been appointed on full time basis, and the committee consist of eight members. The new governance model has been introduced and the municipality has designated ten (10) councilors as chairpersons of portfolio committees assisting the political heads of portfolio committee and provides oversight toward the activities of executive committee.

The MPAC committee has quarterly meetings, and the position of a researcher has been appointed to ensure effective and efficient functionality of the office. The committee has assessed the annual report for 2020/21 and it will also engaged in a public participation session in that

regard. The new governance model has introduced 10 new chairpersons of portfolio committee which support the executive committee and provide oversight function.

Organizational structure

The municipal organizational structure is headed by the municipal manager who is supported by directors, Managers and other officials for effective running of the municipality. The organizational structure is reviewed annually taking into consideration financial and environmental consideration and it is reviewed together with the budget and the integrated development plan of the municipality.

The organizational is an important instrument which ensures that the correct human and financial resources are matched in order to realize the objectives of the municipality as set in the IDP and the supporting sector plans.

The Greater Giyani Municipality has been established in terms of Section 12 Notice.

The administration structure consists of the following departments and Units: headed by Municipal Manager.

- Budget and treasury office
- Corporate Services
- Community services
- Technical Services Department
- Planning and Development; all this position are currently filled by directors.

1.2.2.4. Mandate, Powers and Functions

The Greater Giyani Municipal Council is a category B Municipality which consists of 62 Councilors and 10 Traditional Leaders. The Municipality has been assigned powers and functions in terms at Section 84 (2) of the Local Government: Municipal Structures Act, 117 of 1998 as amended. Greater Giyani Municipality was assigned the following powers and functions:

Table 13: Municipal Powers and Functions

FUNCTION	RESPONSIBLE DEPARTMENT	DEFINITION
Municipal Planning	Strategic Planning & LED	Development of the integrated development plan in terms of the municipal Systems Act, 32 of 2000.
Local Tourism	Strategic Planning & LED	The promotion, marketing and, if applicable, the development of any tourism attraction within the area of the municipality with a view to attract Tourist; to ensure access, and municipal services to such attraction, and to regulate structure and control
Markets	Community Services and Strategic planning and LED	The establishment , operations, management , conduct, regulations and / or control of markets other than fresh produce markets including market permits, location, times, conduct, etc.
Trading Regulations	Strategic Planning &LED	To regulate of any facility and /or activity related to the trading of goods and services within the municipal area not already regulated by National and provincial legislation
Municipal Parks	Technical Services and Community Services	The provision, management, control and maintenance of any land, garden or facility set aside for recreation, sightseeing and / or tourism and including playground, but exclude sport facilities.

Open places	Community Services	The management, maintenance and control of any or facility owned by the municipality for public use.
Noise pollution	Community Services	The control and monitoring of noise that adversely affects the well-being of human health or the eco-system that is useful to maintain, now or in the future.
Control of public nuisance	Community Services	The regulation, control and monitoring of any facility or activity.
Municipal Airport	Technical Services	A demarcation area on land or water or a building which is used or intended to be used, either completely or in part, for the arrival or departure of air craft which includes the establishment and maintenance of such a facility, including all infrastructure and services
Municipal Public Transport	Technical Services	The regulation and control and where applicable, the provision of: services for the carriage of passengers, whether scheduled, operated on demand along a specific route or routes or, where applicable, within a particular area.
Storm Water drainage	Technical Services	The Management Systems to deal with storm water in building-up areas.
Portable Water	Technical Services	The establishment, operation, management and regulation of a potable water supply system, including the services and infrastructure required for the regulation of water conservation, purification, reticulation and distribution; bulk supply to local supply.
Sanitation <i>District function</i>	Technical Services	The establishment, operation, management and maintenance and regulation of a system, including infrastructure, for the collection of human excreta and domestic waste-water to ensure minimum standard of service.
Refuse Removals, refuse dumps, solid waste disposable	Community Services	Removal of any household or other waste and the disposal of such waste in an area, space or facility established for such purpose, and include the provision, maintenance and control of any infrastructure or facility to ensure a clean and healthy environment.
Street Trading	Community Services	The control, regulation and monitoring of the selling of goods and services along a public pavement or road reserve.
Bill boards and the display of advertisements in public places	LED	The display of written or descriptive material, any sign or symbol or light that is not intended solely for illumination or as a warning against danger which: promotes the sale and / or encourages the used of goods and services found on the streets.
Amusement facilities/ beaches	Community Services	A public place for entertainment. The area for recreational opportunities and facilities along the sea shore available for public use and any other aspect in this regard which falls outside the competency of the National and provincial government.
Cemeteries, Funeral palour a and crematoria	Community Services	The establishment, conduct, control facilities for the purpose of disposing of human and animal remains
Municipal Roads	Technical Services	The construction, maintenance and control of all public roads

Street Lighting	Technical Service	The provision and maintenance of lighting for the illumination of streets.
Local Amenities	Technical services	The provision, management, preservation and maintenance of any municipal place, land and building reserved for the protection of places or objects of scenic, natural, historical and cultural value or interest and the provision and control of any of such amenities.
Traffic and parking	Community Services	The management and regulation of traffic and parking within the area of the municipality including but not limited to the control over the operating speed of vehicles on municipal roads.
Municipal Public works	Technical Services	Any supporting infrastructure or services to empower a municipality to perform its functions
Building regulations	Technical Services	The regulation, through by-laws, of any temporary or permanent structure attached to, or to be attached to, the soil within the area of Jurisdiction of a municipality, which must at least provide for approval of building plans, building inspections.
Electricity reticulation <i>ESKOM is responsible</i>	Technical Services	Maintenance of the electricity reticulation network, bulk supply or electricity which includes for the purpose of such supply, the transmission, distribution and where applicable, the generation of electricity and regulation control.

1.2.2.5. Employment equity

1.2.2.6. Retention Policy

Retention policy is in place.

1.2.2.7. Vacancy rate 2022/23

The vacancy rate in the municipality is currently standing at 37% as per the approved organizational structure. For this financial year 20 position has been appointed and will be filled with the hope of reducing the vacancy rate by 20%.

Percentage of position filled	Percentage of position vacant
63%	37%

1.2.2.8. Performance Management System

The Municipality has a Performance Management Framework policy approved and system is developed. There is still room for improvement the area of monitoring, assessment and evaluation.

The PMS policy only addresses the performance of the organizational and S57 managers. SDBIPs for 2021/22 was signed and submitted to COGHTA as per MSA 32 of 2000. Performance report has been submitted on quarterly bases, and Mid-year report 2021/22 was approved by 25th January 2022 and submitted to COGHSTA. The performance audit committee has been appointed by council and it is operational.

1.2.2.9. Challenges on Institutional Development and Transformation

- Office space not adequate to create an enabling working environment.
- Inadequate record Management Systems.
- Inadequate security on some municipal buildings.
- Review of policies.
- Incomplete job evaluation process by SALGA.
- Draft Individual Performance Management policy in place, but there is lack of capacity for implementation of the systems.
- The recent spate of COVID 19 pandemic

1.2.3. KP 3: INFRASTRUCTURE DEVELOPMENT AND BASIC SERVICE DELIVERY

This KPA focuses on the infrastructural development, maintenance and provision of basic services.

1.2.3.1. Water

The Greater Giyani Municipality is not a Water Service Authority. The Mopani District is providing water to our communities and does the maintenance of bulk infrastructure; however GGM and MDM have signed an SLA which defines GGM as a WSP.

The Greater Giyani municipal area is characterized by low summer rainfalls. This results in severe water shortages and drought conditions. However, the municipality has experienced good rains in the year (2021/22), though the rain also damaged some of the road infrastructure.

Water resources are restricted to surface and groundwater. The major surface water resources are the Middle Letaba Dam (fed by Middle Letaba, Koedoes, Brandboontjies rivers as well as minor streams) and The Nsami Dam (mainly fed by Nsami River). The current infrastructure in Giyani is inadequate to supply water to the whole of the municipal area. The district municipality provides 56ml/d to GGM. Middle Letaba Dam and its treatment water works capacity at 24ml/d, Mapuve water works at 3,6ml/d and Nsami Dam and its treatment water works capacity at 28ml/day. The demand for water in villages has also increased. However the pumping capacity have increase due to the commissioning of new water treatment plant at Nsami dam. The department of water and sanitation has embarked on a massive project in greater Giyani for the refurbishment of water infrastructure by putting in new pipeline and upgrading of the existing water plant. The project will in future augment water supply to the whole of greater Giyani municipality.

Source DWS 2018.

Table 17 indicates the main water supply for households in Greater Giyani. Households with water inside their dwellings decreased from 18.94% in 2007 to 11.26% in 2016. These figures are however questionable. Other factors that might have contributed to the latter mentioned fact are the re-demarcation of municipalities. However, 42.83% of the household's does not have access to at least RDP standard water supply in 2018.

Table 17: Main water sources supplying households

(Stats SA, 2016)

1.2.3.1.1. Free Basic Services

The municipality provides **6 kiloliters** of free basic water to all households with piped water. Boreholes are also used in communities where there is an acute shortage of water to augment the supply; the municipality is paying for diesel and electricity used for pumping water to the communities. The municipality also provides free basic electricity to all qualifying household by providing electricity tokens worth 50kwh. All indigent households are encouraged to register with the municipality in order to benefit from the services that the municipality is subsidizing.

1.2.3.2. Sanitation

Sanitation is a major problem, which also contributes to health hazards and underground water pollution. Most of the people within the municipal jurisdiction area use pit latrines (45.5% in 2011) without ventilation while others have no sanitation facilities at all (74.9% in 2016). 22.2% of Households had RDP standard sanitation in 2011 with 41 108 (77.8%) households still below the RDP standard. The department of water and sanitation is in the planning process of constructing new sewer treatment works to augment the existing plant.

Electricity

Electricity is generated and distributed by Eskom. Electricity and energy are provided by means of the following sources:

- Grid electricity, which is supplied from power stations.
- Non-Grid electricity generated from solar panels, petrol and diesel generators, as well as
- Other sources of energy which include batteries, paraffin, coal, wood, candles, gas, etc

The total number of households without electricity in GGM is 9 073 (NB it should be noted that this figure does not include informal settlement).

Table 21 indicates sources of lighting by households in Greater Giyani. It can be seen that the majority of households have been provided with electricity i.e. in 2011 19114 (45.7%) and in 2016 was 35503 (67.2%), therefore 33.8% or 17364 households still need electricity.

1.2.3.3. Refuse removal / solid waste

The Greater Giyani municipality has two solid waste disposal sites. The legal status of the old site is challenged since it does not adhere to the requirements of the Department of Environmental Affairs and Tourism. The site is located at the confluence of Murhongolo and Klein Letaba rivers and waste material overflows and contaminate rivers, causing health hazards. Littering and illegal dumping is also a major problem, particularly in the CBD area of Giyani Town and along the main roads. There is no proper refuse removal systems in the rural areas (63.2% use their own dump site) therefore, causing a health hazard. The municipality is intending to extend this service to rural areas (8 villages). A new land fill site has been established and has acquired the related legal status. The site is not yet functional; however the landfill site has been completed and awaiting to be operationalized. The are plans to officially close the current dumping site as soon as the new landfill site is fully functional.

1.2.3.4. Housing

In terms of the information provided by the local communities, housing is one of the needs, which require some attention, in order to achieve the ultimate goal of providing decent shelter and a better life for all. In terms of Table 23, a large number of people are not properly housed and that becomes a problem during the rainy seasons.

Table 23: Number of sites by housing type

Housing Type	No of Sites 2012 COMPLETED	Backlog
PHP (people housing program)	12 354	17 826
Rural Housing (RDP)	13 487	18788

(Source: Municipal Database, 2016)

In terms of Table 24 most dwelling in Greater Giyani are either formal (44.4% in 2011) or traditional (53.3% in 2001). It is notable that the number of formal houses increased from 30.5% in 1996 to 44.4% in 2011 while traditional houses decreased from 66.45% in 2007 to 53.3% in 2011. Therefore, the housing backlog be the informal & traditional dwellings amounting to 28 985 or 55.4 the department of local government has appointed consultants to develop the housing chapter for Greater Giyani which will inform the housing need of the

municipality. This chapter will also assist in the establishment of integrated sustainable human settlement and also making our IDP credible. According to municipal housing chapter the housing backlog is estimated at 22504 housing units. The housing chapter has also identified possible land that could be used to build new houses in line with government policy of integrated human settlement.

It must be indicated that the majority of houses in Greater Giyani are thatched roof mud roundavels, some of these houses were destroyed during the recent floods. This problem persists during rainy period. There are township establishments in the municipality. Department is also building houses (RDP) within existing stands in the villages and some middle-income township establishment in the municipality. Provincial department of housing has allocated more than 190 units in the current financial year to deserving beneficiaries to alleviate the housing backlog in the municipality.

1.2.3.5. ROADS AND TRANSPORT

1.2.3.5.1. Roads and Storm Water

The road network within Greater Giyani Municipal area which was damaged by the rainfall during the recent rains are being repaired. What remains now is for provisions to be made to ensure that they are maintained regularly, and potholes are also repaired. Most of the roads need rehabilitation and maintenance especially provincial road e.g. Giyani to Phalaborwa and Giyani Via thomo roads and bridges need to be repaired due to high rainfall during December 2020 to March 2021 .Giyani has approximately **200 KM** of provincial tarred road which cut across the municipality and approximately **700 KM** of gravel road belonging to the District and local municipality needs to be surfaced.SANRAL has approved two roads that will be surfaced in the near future with the total of 61KM in the municipality e,g Mageva to Makhuva 29KM and thomo to Hlomela road 32KM this will significantly reduce the number of gravel roads in the municipality and the total of 15000 households will benefit out of this projects.

1.2.3.5.2. Strategic Road network: Map: 5

Source: GGM SDF 2021

Map 3 displays the spatial road network of Major roads that link Giyani to neighboring municipalities and the Kruger National Park and Tables below provides a description and type of utilization of the road. The roads are either linkages to strategic destinations or are freight and economic corridors. Table 25 indicates roads' numbers and their kilometers and most of these roads need serious attention. EPWP is being used as a vehicle to assist the municipality in addressing potholes and all other roads maintenance programmed in the municipality.

Most streets in Giyani, with the exception of Kremetart, have no names. This creates problems for tourists, businesses, emergency services and police services. Road & information signs are also critical in the municipal area. The municipality has started a process of street naming in all the township and communities are encouraged to participate in the process of naming the streets, service providers are onsite to facilitate the process of naming of streets.

Public Transport

With regard to public transport, the area is served by buses and taxis. GNT has a fleet of more than 40 buses which have been distributed all over Greater Giyani Municipal area, however the fleet is dilapidated and some of the no longer in use. The buses serving the area are augmented by long distance buses which are either privately owned, ferrying passengers from Giyani to Gauteng on a daily basis. There are private bus companies which assist in conveying commuters to and from work on a daily basis, e.g. Risaba Bus Service and John Hlungwane as well as approximately 500 fleet of taxis. Table 26 presents the main mode of travel to work for the population in Greater Giyani during 2001. From the table it is clear that most people get to work/school on foot (44%), while 2.4% use minibus/taxis.

Stats SA, 2016

The municipality has a traffic testing station. The station operates under the framework of NaTIS Regulation and performs transactions such as vehicle registration and licensing, learner license testing, driver's license testing, driver's license card renewals and vehicle roadworthy testing. The station has been upgraded from grade B to grade A testing station which will also test heavy duty vehicles like trucks and buses this has significantly reduced the backlog in the municipality.

Greater Giyani municipality has an airport/landing strip which was developed by the former Gazankulu Government. The strip has not been adequately utilized due to poor and unmaintained infrastructure. However, the Gateway Airports Authority Limited (GAAL) has indicated plans to upgrade and maintain it. The municipality intends to put strategies in place to market and promote the airport. Some developers has shown interest in partnering with government to upgrade and utilize the airport for commercial purposes.

The Department of Transport has indicated the intention to revive the idea of an intermodal transport facility which was put on hold due to financial constraints by provincial government. This will serve as a taxi and bus rank with some local amenities. The municipality is in negotiations with local traditional authorities to avail land for this proposed development.

1.2.3.6. Safety and Security

The municipality has one police station which is operational and the other one at Muyexe is yet to be completed with three satellite stations: Dzumeri, Makhuva and Bend store. The police stations is fully operational, However the municipality is developing more resources will be required, in order to enhance service delivery. There is a need to increase the number of satellite police stations to ensure that all areas have access to police services. Community policing fora have been established in all wards to deal with crime related issues. The police station has +-700 police officers which have been distributed to all the units. The most common crimes in the Giyani policing area are:

- Housebreaking (business and residential)
- Assault
- arson
- Rape
- Murder
- Stock theft
- Car hijackings
- Gender based violence.

There are some challenges which impact on the police ability to fight crime effectively e.g. bad road networks, lack of street names and poor communication services. The municipality is doing its best to

assist in the war against crime by improving the road networks and erecting high mast lamps in crime hotspots. It is also in the process of street-naming which will assist the police to respond to complaints quickly. The municipality has installed 91 high mast lights in all the villages, except in the newly formalized settlements.

1.2.3.7. Education

Education is one of the key priorities of the present government; this analysis will try to highlight the number of schools per circuit in Greater Giyani. Greater Giyani is divided into five circuits as depicted by the table below:

Table 27: Education Circuits

Circuit	Number of primary schools	Number of secondary schools	Number of educators	Number of learners primary schools	Number of learners of secondary schools
Nsami	15	10	496	8705	6080
Klein Letaba	18	13	556	9537	7420
Groot Letaba	18	12	529	8236	7590
Manombe	23	15	744	10970	8558
Shamavunga	20	15	688	8880	7044
TOTAL	94	65	2528	46328	36692

1.2.3.7.1. Teacher learner ratio and quintiles

Table 28: Teacher learner ratio and quintile levels

1	2	3	4	5	Total
101	25	22	1	0	149

There is a challenge with regard to most schools in rural areas, which are dilapidated, with no proper sanitation and water. The department is in the process of rehabilitating most of them by building new state of the art classrooms. The department is also providing scholar transport for villages which do not have schools within a 10km radius.

1.2.3.7.2. ABET and ECD Centers

The municipality is having ABET and ECD centers which provide education to children and adults. There are approximately 30 ABET centers and more than 100 ECD centers that assist communities with early learning and adult basic education in order to realize the objectives of National Development plan (Vision 2030) of universal access to education.

1.2.3.8. Sports, Arts and Culture

Sports and recreation is coordinated by the Department of Sports, Arts and Culture of Limpopo in liaison with the local municipality. Sport council is in place to coordinate sporting activities. The development of sports in the municipality area is still a challenge. There is a need for constant maintenance of our sporting facilities. The municipality has signed a memorandum of understanding with the district municipality as well as the department of Sports, Arts and Culture to upgrade the Giyani Youth Camp into a sports academy for the whole district however budget is still a challenge to achieve this goal.

The municipality is having 10 sport centers and their status, namely:

- ❖ Dingaan Peter Rikhotso. (Need refurbishment)
- ❖ Homu (incomplete)
- ❖ Amon Nghulele(needs refurbishment)
- ❖ Mavhuza(need refurbishment)
- ❖ JB Chauke(need refurbishment)
- ❖ Mzilela (dilapidated)
- ❖ Thomo (private and need refurbishment)
- ❖ Mapuve(private need refurbishment)
- ❖ T P Khuvutlo (need refurbishment)
- ❖ Kremetart(need refurbishment)
- ❖ Muyexe need refurbishment)
- ❖ Section E (incomplete)
- ❖ Shivulani (incomplete)
- ❖ Mageva. completed

Most of these centers have been vandalized due to underutilization and the lack of security personnel; however the municipality is engaged in the process of revitalizing the centers by encouraging communities to take ownership and taking care of their facilities and also by appointing security personnel to guard these facilities.

Library Facilities

There are five libraries in the municipality which assist the communities with access to information. They are as follows:

- Giyani
- Mopani District Library
- Makhuva
- Muyexe
- Xihlovo
- Zamani
- Mavalani .

The challenge, however, is that these facilities have a shortage of books and computer equipment as well as opening and closing times for access by the communities.

1.2.3.9. Arts and Culture

The municipality is having an arts and culture center which assists the community in facilitating arts and culture related work. However, the Centre is not fully utilized as there is no full time staff dedicated to it. The center will be up for face lift in the next financial year. The municipality in partnership with SABC Munghana Lonene Xitsonga music award is proving to be a catalyst for sustainable arts and culture festival that has a potential of improving the lives of the local artist. There is a plan to make it an annual event that will celebrate the cultural diversity of the local people.

1.2.3.10. Heritage Sites

The municipality currently has one declared heritage site which is Baleni. It is found 30 km east of the Giyani town, which has natural phenomenon e.g. natural salt and hot spring water. More research needs to be conducted to discover other heritage sites in the municipality.

1.2.3.11. Thusong Service Centers

The municipality is having three Thusong service centers(one stop centers) which assist the community in accessing various government services through GCIS. These centers are located at:

- Makhuva
- Zava
- Muyexe

Additional centers are needed in order to help communities to access services closer to their homes and also to bring services closer to the communities. Staffing, equipment and usage are still a challenge.

Table 29: Primary Health Care Facilities (and staffing)

Facility	OPM	Nurses	Facility	OPM	Nurses
1. Msengi/24h via on call	1	8	2. Ndhengeza/24h via on call	1	11
3. Nkuri/24h via on call	1	11	4. Ntluri/24h/on call	1 act.	8
5. Basani/24h night shift	1 act.	15	6. Hlaneki /24 on call	1 act.	11

9. Sekhimini/24h via on call	1	10	10. Ngove/24h on call	1 act.	11
11. Kremetart/day care clinic	1	12	12. Bochabelo/24h on call	1 act.	9
13. Nkomo/24h night shift	1	12	14. Gateway day care clinic	1 act.	12
15. Xitlakati/24h via on call	1	7	16. Zava/24h/on call	1 act.	9
17. Makhuva/24/on call	1	13	18. Kheyi/24h on call	1	8
19. Matsotsosela/24h via on call	1 act.	7	20. Shikhumba/24h shift clustered with nkomo clinic	1	9
21. Shivulani/24h via on call	1 act.	11	22. Muyexe/24h on call	1 act.	9
23. Mhlava-Willem	1 act.	11	24. Khakhala-Hlomela/24h on call	1 act.	10
25. Thomo	1 act.	14	26. Mapayeni/24h on call	1	14
27. Nkhensani Gateway	1 act.	8	28. Dzumeri Mobile 2	1 act.	11
29. Giyani Mobile 3	1	13	30. Giyani Health Centre/24h night shift	1 2 act.	38
31. Dzumeri Health Centre/24h night shift	3 act.	37	Total: Permanent OPM = 14 Acting OPM = 20 Nurses = 386		

The facilities are feeders to the NKhensani Regional Hospital and Evuxakeni mental institution. The challenges are that most of the facilities are managed by acting personnel and there is a shortage of professional staff. NKhensani Hospital is unable to attract highly qualified personnel because of its

grading. This also created a lot of referral movement to the Mankweng and Letaba hospitals respectively.

The state-of-the-art nursing college is currently producing personnel who migrate to other areas and do not feed the local health facilities. A rigorous marketing campaign is needed in order to attract locals as students in the facility to augment the current staff in our local health facilities.

Emergency Medical Services (EMS) are not enough with only three (Giyani, Dzumeri and the proposed Muyexe).

Most of the local health facilities are not easily accessed by the community because of the dilapidated road networks and poor communication infrastructure.

Most cases are not promptly addressed as communication systems to ambulances are stifled by the lack telecommunication aerials(high masts aerial)

1.2.3.12. Rural Development

The new government has set itself five key priority areas:

1. Education
2. Creating decent and sustainable jobs
3. Rural development and land reform
4. Health and social development
5. Fighting crime and corruption

Greater Giyani was chosen as a pilot project for rural development in South Africa. Muyexe Village in ward 18 was selected to be a pilot project for this new initiative. The President of the country has on 17 August 2009 officially launched the comprehensive rural development program in Muyexe village. The CRDP in Muyexe will be used as a model for rural development in the country. The community of Muyexe has identified 25 key priority issues (projects) for the CRDP to address.

Different government departments, state owned enterprises; NGOs have committed themselves to fund some of these projects. The program will run for two years under the leadership of Department of Rural Development and Land Reform. The department has also added 3 villages which also form part of CRDP sites which are; Thomo, Dingamanzi and Gonono. The project is currently no longer active although government has invested a lot of money in the area, provincial government need to ensure that projects that were initiated are sustained and those that are not complete are completed and handed over to the community.

1.2.3.13. Challenges: Infrastructure Development and Basic Service Delivery

- Inadequate and dilapidated infrastructure for water and sanitation
- Inadequate storm water drainage
- Shortage of water
- Inadequate sanitation infrastructure, as a result contaminating underground water
- Vandalism of community facilities
- Inadequate animal pounding infrastructure and the unit is not fully functional
- Lack of enforcement of by-laws
- Town Planning Unit not fully functional.
- Land use Scheme not applied
- Illegal development and connection to services
- Inadequate road infrastructure
- Sports facilities not fully utilized.
- Invasion of proclaimed land and open spaces
- Lack of proper public transport facilities e.g bus rank
- SDF not adequate to assist environmental restrictions
- Lack of security on municipal properties, such as boreholes
- Lack of resources
- Heavy rainfalls
- Poor storm water drainage system.
- Poor public transport infrastructure eg lack of proper bus rank
- Inadequate public transport by-law enforcement
- High numbers of KM of gravel road
- Poor road signage
- Poor public transport connection nodes
- Poor regulation of taxi industry
- Poor maintenance of public transport systems

1.2.4. KPA 4: LOCAL ECONOMIC DEVELOPMENT

1.2.4.1. Economic Overview

The economy of the municipality is underpinned by four economic sectors, namely:

- Agriculture
- Tourism
- Retail
- Manufacturing.

Giyani comprises of four divergent sub-economies. The public sector which is the major contributor to the GDP, agriculture comprising of small scale commercial farming, retail and service sector, mainly in the Giyani CBD, and transport which is mainly concentrated in the taxi and bus industry, although its contribution is very little. The municipality has managed to create more than 3100 short and long term jobs through LED initiatives most of those jobs were created through EPWP and CWP programs which is currently in ward 18, 23,10,21,22,6,3 and 26.

Economic activities contribution

Economic activity	Contribution to GDP	Contribution to LED
Agriculture	17%	8%
Tourism	6%	3%
Mining	0,01%	0.1%
Trade	21%	7%

1.2.4.2. Economic development in the municipality

The economic activity that mostly takes place in Greater Giyani both formal/informal are: small-scale agriculture (maize, vegetables, tomatoes, and beef), services, and transport and retail development. There are however, a number of factors impacting negatively on the economic growth such as geographical location (distance to markets), shortage of skills, poor infrastructure, climatic conditions and diseases (HIV & Malaria). The municipality has potential for tourism and conservation development due to the existing natural heritage sites through the area, mining(24 disused mines), abandoned farming schemes, processing of natural products (Mopani Worm and Marula Fruit).According to our spatial development framework different nodes were identified as growth points, e.g

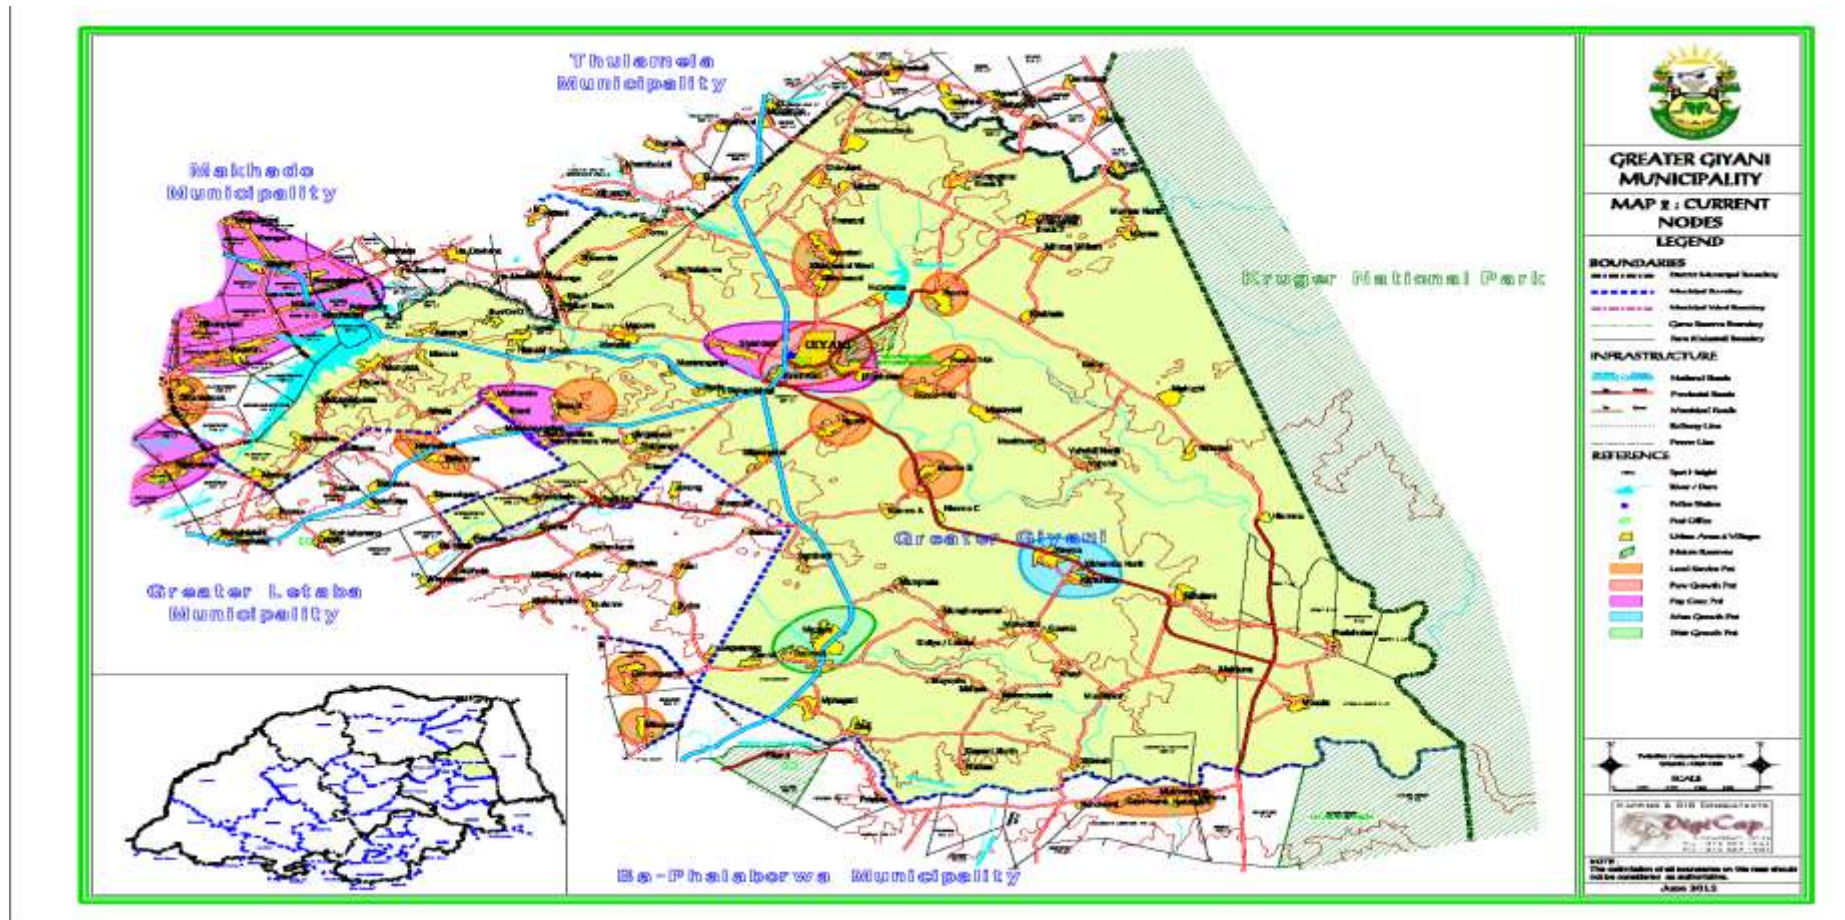

Table 30: Economic Growth points

Prov. Growth points	District Growth points	Municipal Growth points	Local Growth points
Giyani	Ndhambi	Xawela, Nkomo, Xikhumba, Muyexe Gonono Dingamanzi	Mavalani, Thomo,, Homu,, Ngove, and xikukwani.

Table 30 indicates Economic Growth points within the municipality and Map 3 gives a spatial expression of the nodes. Routes connecting Giyani Town and development nodes are all tarred. There is still a need to unlock economic potential activities within the identified nodes. The municipality is to develop a Master plan that will assist in mobilizing funding and attracting investors in the Nodes.

Map 6 further indicates proposed development corridors which are aligned with the development Nodes.

Map 6: Economic growth point

Source: GGM SDF 2021

1.2.4.3. Opportunities for Economic Growth

The municipality's LED strategy points to many growth opportunities, especially on natural resources, tourism and agriculture. The beneficiation of natural resources, which is in abundance in our municipality, has a potential of growing the local economy and creating employment. GGNRDP is an excellent example of natural resource beneficiation. Our close proximity to Kruger National Park is also an opportunity for economic growth. Covid 19 is one of the challenges that the municipality is facing and it will have a serious impact on the economic growth of the municipality especially on the tourism sector which is one of our pillars in terms of our economic growth. In response to this challenge the municipality has set aside some funds in our budget that will mitigate the effects of COVID 19 pandemic by ensuring the rolling out of major infrastructure programme which have the potential of creating jobs.

1.2.4.4. Comparative Advantages

Giyani municipality has a comparative advantage in the district because of its large tracts of productive land. The striking natural landscape and the major development corridor routes which pass via Giyani and our low crime rate can be a catalyst to serious economic growth. The pilot project at Muyexe is also an advantage to our economic growth. Two major roads which links the municipality to all major tourism areas are currently being upgraded to link the whole province with Kruger national park

1.2.4.5. Sector Analysis

1.2.4.5.1. Tourism

With the striking natural landscape and close proximity to Kruger National Park put Greater Giyani in a good stead to be a tourism destination of choice. Middle Letaba and Nsami dam offers opportunities for water sports and fishing. The statue of Nghunghunyani, which is situated at the banks of Letaba River and Maombe nature reserve offer some impetus to the tourism industry. Shangoni gate, situated 40 km from Giyani, can also attract more tourists. The department of rural development and land reform in partnership with KNP is in the process of opening the Shangoni gate, a service provider has been appointed to conduct the feasibility study to determine what kind of businesses can be conducted outside the gate and KNP is busy with their road network inside the park.

There is an estimated 700 beds distributed amongst 50 bed and breakfast; lodges; and hotel in the municipality. 70% of these facilities are found in town or very close to town. These facilities offer clients outstanding service at reasonable rates. Our tourism strategy offers opportunities for investors to invest in tourism industry in Giyani because of its striking natural landscape and eco-cultural activities. Greater Giyani municipality has a competitive advantage in this area due to our proximity to Kruger national park and

other tourist attraction areas. Department of water and sanitation has concluded plans to maximize the use of our two dams as potential tourist attraction centers, water sports like boating, fishing and professional fishing will be conducted in the dams. As indicated above the impact of COVID19 will seriously impact on the tourism sector since a limited number of tourist will not be coming to our tourism hotspots due to the disease.

1.2.4.5.2. Agriculture

Currently agricultural products are undergoing serious decline because the area has been hard hit by drought and shortage of water. However, with the recent rains agriculture can be a major contributor to the local economy if the climate can be favorable. Agriculture has been a backbone of Giyani local economy. The municipality has vast track of arable land and irrigation schemes. The grater Giyani economic summit identified several projects that need to be explored and implemented as per LED strategy implementation plan. We are currently in the planning process to review our LED strategy to include some of the key agricultural development that are currently being explored especially the revitalization of former homeland irrigation schemes by the department of rural development and land reform.

1.2.4.5.3. Retail Sector

The retail sector is also a major contributor to the local economy and most activities of this sector are concentrated in Giyani town and CBD. There are a number of shopping centers and Masingita mall which makes shopping a pleasant experience in Giyani. Spar Centre and Pick 'n Pay is also major shops in the CBD. Banks and restaurants are also well represented in the CBD. We have five major banks, e.g. ABSA, Standard Bank, First National Bank, Nedbank and Capitec. Bank.Masingita group has recently opened a regional mall in the CBD with big retail stores e,g game. This mall will serve as a catalyst for economic growth as local SMMEs will be supplying the various shops with their products. Masingita group of companies are in the process of starting a new development along the R81 road next to kremetart the development will include a retail sector that will have hotel,motor dealership,petrol station and convenience shops that will serve as an anchor for future development along the R81 road.

1.2.4.6. Informal Sector

Informal sector also plays a key role in the local economy. Informal trading is more prevalent in the taxi ranks with hawkers lining their products on the pavements. Giyani has approximately **800** hawkers who are having some formal agreement with the municipality; however, the municipality is updating the data base. Currently the by-laws are not being implemented and this has a negative environmental impact and puts a strain on the cleaning services provided by the municipality. There is currently no infrastructure such as sanitation and water for hawkers operating within the CBD. The informal sector in Giyani is one of the fastest growing economic contributors towards sustainable growth in the municipality, it contributes more than 20% of gross domestic products in Giyani. This sector needs to be regulated in order for the municipality to realize its full potential in terms of job creation and economic development. The municipality is currently in consultation with various stakeholders with the view of giving the town a facelift by ensuring all illegal structures are demolished and replaced with a new look structures, a service provider has been appointed to facilitate the cleaning of the town.

1.2.4.7. Challenges: LED

- Infrastructure development
- Lack of Business investment, attraction, and retention strategies
- Lack Value chain
- Lack of enforcement of by-laws
- Budget constraints
- Lack of municipal property for economic development
- Distance to the markets
- Lack of land for development.
- Insufficient land for business and residential development.
- Dilapidated road infrastructure network
- Long distance to market
- Shortage of technical skills required to improve the economy
- Shortage of reliable water for economic development
- Unstructured development in the CBD and adjacent township.
- Absence of factories and warehouses for economic development
- COVID 19

1.2.5. KPA 5: FINANCIAL VIABILITY

1.2.5.1. Overview of alignment between IDP and BUDGET

The constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in south African society can only be realised through credible integrated developmental planning processes. Municipalities in south Africa need to utilise IDP as a method to plan future development in their area of jurisdiction so as to find lasting solutions to achieve sound long term development goals as espoused in the NDP. Municipal IDP provides a five year long strategic programme of action aimed at setting short, medium and long term strategic and budget priorities to create a developmental platform, which correlates with term of office of political office. The plan aligns the resources and the capacity of the municipality to its overall developmental aims and guides the municipal budget. The IDP is therefore a key strategic instrument in which the municipalities use to provide the vision, leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make best use of scarce resources and speed up service delivery.

Integrated developmental planning in the context of south African planning trajectory is aimed at involving all role players to jointly find sustainable solution to their developmental challenges. It provides strategic environment for managing and guiding all planning, development and decision making in the municipality. It is of critical importance that The IDP developed by municipalities correlate with national and provincial development goals in other words it must integrate with all scopes of government.

The aim of constantly revising the cycle is to develop and coordinate a coherent sound plan to improve the quality of life for all the people living in the area, also reflecting on the issues happening in the provincial and national sphere.

Table 31: Budget performance 2021/22

Table 31: Budget performance for 2020/21 to 2021/22

Table BB demonstrates that from the previous 4 years the municipality did not meet the target as planned due to various reasons such as high indigent register, poverty levels that directly relates to household affordability. However, the municipality is looking into the review of the revenue enhancement strategy in 2021/21 financial year. The municipality is in the process of data cleansing to ensure that we bill correct customers.

Table 31: Budget performance: actual expenditure on operational, capital and revenue collection

IDP objective	KPI	ACTUAL 2020/21	ACTUAL 2021/22	ACTUAL 2022/23
To improve financial management systems to enhance revenue base	Operational expenditure	211 638 263	458,119	455,663
	Capital expenditure	136 583 819	138,638	92,530
	Revenue collection	9 490 000	599,757	548,192

Table CC indicates that there is a need for the municipality to develop strategies that will improve on capital expenditure and project management. The Operational expenditure is slightly high due overtime expenditure and disaster occurrences e,g Covid 19 is one of the major cost drivers in terms of operational expenditure.

Table 32: Income (Types of grants)

Type of source	Projected budget 2021/22	Projected 2022/23

	'000	
Equitable Share	R369,293,000	R352,203,000
Financial Management Grant	R2,200,000	R2,400,000
EPWP	R3,851,000	R4,035,000
Municipal Infrastructure Grant	R64,105,000	R69,261,000
National Electrification Grant	R11,724,000	R20,584,000
Transfers from District	R0	R0
LGseta	R300,000	R310,000

1.2.5.3. Debtors Account

Table 34: Debtors Account

Financial Year	'000
2009/10	47,468
2010/11	67,453
2011/12	74 454
2012/13	39 297
2013/14	73 759
2014/15	76 812 795
2015/16	88 589 089
2016/17	92 696 100
2017/18	96 756 000
2018/19	101 234 000
2019/20	

1.2.5.4. Revenue by sources

The following revenue sources are ranked per their performance for 2022/23

Table 35: Revenue Sources

Tariff	Ranking per performance
Property rates	1
Sale of water	2
Vehicle licensing	3
Refuse removal	4
Vehicle registrations (agency fees)	5
Sewerage	6
Confirmation letters	7

Sale of tender documents	8
Advertising & billboards	9
Traffic fines	10
House rental	11
House loans	12
Building plans	13
Sewer unblocking	14
Sale of grave-plots	15
Hall reservations	16
Sale of sites	17
Water re-connection	18
Registration & transfers	19

Registration of suppliers	20
Use of caravan park	21

The total number of indigents is 22 845. The municipality is providing free Basic services to all registered indigents. Tariffs on FBS are as follows:

Table 36: Tariff and Basic Services (2021/22-22/23)

Revenue category	2021/22 proposed	2022/23 proposed
Property rates	4,6%	4,6%
Refuse removal/solid waste	4,6%	4,6%

Property rates increases are necessitated by among others the inflation rate, it is therefore important that in the light of inflation forecast and our need to remain afloat as critical government institution that property rate be increase. The forecast of property rate is 4,6% in terms of budget circular 99 for 2020/21 MTREF.

We all know that inflation will rise and the cost of delivering services will also rise, this includes labor related costs, maintenance and running cost and thus call for the increment of user charges. Having taken into cognizance the various factors such as income levels, unemployment statistics and the inflation forecasting the above table reflect the increase in the coming financial year

Financial Management Policies

Supply Chain Policy

Supply Chain Management Policy is in place and aligned to model SCM policy developed by NT. Amendment in the form of Policy Addendum. SCM policy makes provision for LED through preferential points for locality to support development of SMMEs and PDIs, participation of targeted sectors (e.g. SMME) promoted through flexibility of functionality points on the evaluation mode, spending quotas per targeted categories of bidders (e.g. SMMEs)

1.2.5.4.1. Budget related and other policies

Table 38: Other financial policies and their status 2022/23

1.2.5.5. Impact of Covid 19 on the Budget and IDP

The Covid 19 was declared a pandemic of international proportions by the world health organisation WHO on the 5th of march 2020 south Africa registered it first case wherein after the new infection and transmission spread rapidly across the country. Having considered the magnitude and the severity of the virus and the possible future impact for south Africa the minister of cooperative governance and traditional affairs declared the national state of disaster in terms of (act no 57 of 2002) and lockdown was announced from the 27th of march 2020.

Covid 19 is having serious implication on the development of both IDP/budget because certain budget cuts need to be implemented to address the provision of personal protective equipment's and certain infrastructure needs to be built to combat Covid. With the current universal rollout of vaccine municipal budget were have to be cut in order to fund vaccine rollout throughout the country this has also affected our budget and it will impact negatively to the service delivery project of the municipality. Majority of projects which were earmarked to be implemented in the medium-term framework has to be deferred to future financial years

1.2.5.6. Asset Management System

Assets management is one area the municipality is still struggling however; the municipality has appointed a service provider to update our fixed asset register which is GRAP compliant and other related systems. The municipality is currently conducting asset verification twice per annum. we are currently building in-house capacity to deal with assets management. Staff has been provided to augment the current staffing in the unit with the view of reducing the use of consultants as previously raised by auditor general

1.2.5.7. Challenges: Financial Viability

- Low revenue base,
- No cost recovery in rural settlements
- Inadequate personnel to implement strategies.

- Inadequate financial systems
- Increasing debt accounts
- Culture of non-payment of services
- Asset management.
- Poor record keeping
- Limited revenue and high number of indigent households
- Covid 19

1.2.6. KPA 6: GOOD GOVERNANCE AND PUBLIC PARTICIPATION

Section 152 of the Constitution requires the involvement of communities' local government processes. The Municipality has established political structures according to the Municipal Structures Act. The structures are community representatives in the governance of the municipality. Delegation of powers has been developed to ensure effective and efficient governance. Covid 19 has added another dimension to this critical process because in the previous and current financial year we are struggling to conduct meaningful physical public participation due to the pandemic but we are using proactive method like using our regional radio station and local radio stations to conduct our public participation session. Zoom platforms and social media space are also used to communicate municipal programs and processes.

1.2.6.1 Auditor General opinions

The Audit Issues in the AG are mainly on finance and other issues were on leave systems and Supply Chain. On the management report the issues on the alignment of SDBIP and IDP was emphasized. The municipality has also established the municipal public accounts committee (MPAC) which will assist the municipality in achieving clean audit.

However, an AG mitigation plan has been developed. Some of the issues were given immediate attention and some were to be addressed by the appointment in vacant positions and the others in the 2020/21 financial year.

Financial Year	Opinion
2014/15	Qualified
2015/16	Qualified
2016/17	Adverse
2017/18	Qualified
2018/19	Qualified
2019/20	Unqualified
2020/21	qualified

1.2.6.2 Risk Management

A risk management plan is in place. Some of the risks are managed on a day-today bases and some will be factored in to the IDP 2019/20 financial year, risk manager has been appointed to manage all strategic risk in the municipality. The municipality has appointed risk management committee that assists the municipality to ensure all top ten risks are well managed.

Top 10 municipal strategic risks
1 Dilapidated infrastructure
2 Inability to attract and retain competent staff
3 Inadequate revenue sources
4 fraud and corruption

5 lack of land ownership
6 Unstructured land development
7 Uncoordinated record management system
8 Inadequate participation of stakeholders in public participation activities
9 Inability to attract and retain investors

1.2.6.3 Auditing

The Audit committee has been appointed and its functional it is assisting the municipality to follow-up all issues as raised by auditor general and advice the municipality to respond to queries. The audit committee is reviewing all the municipal documents with the assistance of the internal auditor before documents are submitted to auditor general. Municipality has established audit steering committee which meet regularly to implement the audit action plan and to come up with proactive measures to improve municipal audit outcome.

1.2.6.4. Relationship with Traditional Leaders

In general, the municipality has a good working relationship with traditional leaders. All ten traditional leaders are members of different committees and they participate in all municipal activities e.g. IDP Rep Forums, Imbizos and Council sittings. The municipality currently assists traditional councils with logistical requirements. The mayor has established the Mayor-Tihosi forum which meet on quarterly basis to review progress in relation to service delivery and all matters of mutual interest e,g Land development and arts and cultural activities. Budget has been set aside to compensate the traditional leaders for attending official engagement e,g council meetings.

1.2.6.5. **Special Programs**

The special programs of the municipality are located in the office of the Mayor to champion the interest of designated groups in the municipality. The programs are as follows:

- Youth
- Disability
- Old Age
- HIV/AIDS
- Traditional Support
- Gender

Some of the needs of the special groups are as follows:

- Skills development
- Employment opportunities
- Assistance devices e.g. wheelchairs, walking sticks and hearing aids
- Housing
- Access to government facilities and services

The office of the mayor through the manager in the office is coordinating all this programme to ensure social cohesion in the municipal area and to ensure intergovernmental relation with all spheres of government.

1.2.6.6. **Portfolio Committees**

The municipality has established portfolio committees headed by political heads. Portfolio committees are chaired by chairperson appointed by council to ensure proper oversight by executive committee in line with the new governance model. Administrative Heads (Directorates) in the municipality are providing the necessary technical assistance. The municipality has implemented the system of clustering, and the following grouping has been agreed. The clusters are as follows:

- Shamavunga(wards 10,21,22,23,29)
- Nsami(Wards 14,16,17,18,19,20)
- Middle-Letaba(wards 1,2,3,4.,6,7,8,)
- Chamiriri(wards 23,24 25,26,27,28
- Man'ombe(wards 5, 9,11,12,13,14,30 and 31)

This clusters are a vehicle through which the municipality is able to service the communities with relative ease especially during IDP/Budget public participation.

MUNICIPAL WIDE PRIORITIES.

- Water and sanitation
- Roads and storm water drainage
- Electricity extensions.
- Health Facilities
- Sports Facilities (community facilities)

- Community halls.
- Housing
- Fencing and access to cemeteries
- Refuse removal
- Education Facilities
- Culvert bridges
- Cellphone networks
- Greening projects
- Clinics.

Public participation

Table 40: Public Participation inputs

During public participation sessions, the communities reflected the following challenges pertaining to their localities:2022 to 2023

WARD 1	SHIMAWUSA Apollo light Electrification of the extension Clinic	BLINKWATER Apollo lights Access Bridges RDP Houses Electrification of Extensions Additional Boreholes	NOBLEHOEK Access Bridges Tarring of Road from Babangu to Blinkwater Water Apollo lights Additional Classrooms

1.2.6.7. **Ward Committees and CDW**

The municipality has establish 31 ward committees after the local government elections to add on the current 31 wards. . Their main role is to ensure that communities in their wards are involved in and informed about council decisions which affect their lives. The ward committees have been set up in a way that they can reach most sectors in their various wards. The ward committees’ main tasks are to communicate and consult with the community in respect of development and service plans. The municipality is currently allocated 20 community development workers each allocated various wards and they assist in the collating of information from their wards and update profile of each ward.

1.2.6.8. **Public Participation and Communication Strategy**

The municipality has been promoting public participation through various mechanisms such as the IDP Representative Forum, Imbizos, ward committees and newsletters to ensure that information is disseminated to the community. The municipality has appointed a senior communications officer who deals with communication and events management issues. A communication strategy is in place and a public participation policy is in the process of being developed.

1.2.6.9. **Public Participation and Good Governance Challenges**

- Minimal participation by sector departments.
- Lack of effective community structures
- Lack/minimal participation by traditional councils.
- Lack of participation by professionals (e.g. educators, nurses and doctors, etc
- COVID 19

2. STRATEGY DEVELOPMENT PHASE

The Municipal Systems Act of 2000, chapter 5, requires that municipalities must develop strategies in line with any National and Provincial sector plans and planning requirements binding on the municipality in terms of legislation.

The development of Strategies demonstrates that all needs and challenges identified in the analysis phase will be addressed. Strategies were developed per Key Performance Indicator (KPI) addressing a specific National KPA. The strategies Developed are smart i.e. specific, measurable, attainable, realistic and time bound.

2.1 VISION, MISSION AND VALUES

VISION

“A Municipality where environmental sustainability, tourism, agriculture and mineral resources thrive for economic growth”

MISSION

“A democratic and accountable municipality that ensures the provision **of quality and sustainable services through sound environmental management practices, local economic development and community participation**”

VALUES

Commitment

People centered

Honesty

Ubuntu and excellence.

2.2. SWOT ANALYSIS

Prior to the development of strategies, a SWOT analysis was established. The purpose of the SWOT analysis is to assist the municipality to do introspection, and understand internal and external factors that made the success and failures of the municipality.

SWOT analysis is as follows:

Table 41: SWOT.

<p>STRENGTH</p> <ul style="list-style-type: none"> • Land use management policies in place (SDF, LUMS, By-laws) • Environmental framework (disaster management policies, integrated waste management plan) • Waste management facilities • Tourism • Sport facilities in rural communities • Skilled personnel 	<p>WEAKNESSES</p> <ul style="list-style-type: none"> • Lack of implementation of land use management policies and by laws. • Lack of engagement with the review processes of policies (lack of ownership) • Out-dated data that does misinform planning • Lack of capacity in land use management • Lack of institutional governance systems (record management and mail/ correspondence system) • Minimum utilization of facilities and development programs • Lack of insured infrastructure • Lack of integrated processes • Lack of implementation of council resolutions • Poor maintenance of infrastructure
<p>OPPORTUNITIES</p> <ul style="list-style-type: none"> • Tourism • Waste recycling which will result in create jobs • To produce a healthy society due to availability of sport facilities • Poverty: Government investment directed to Giyani • Proximity to Kruger national park 	<p>THREATS</p> <ul style="list-style-type: none"> • Lack of critical/ specialized skills to ensure legislative compliance (esp in land use and finance) and has a negative impact on development • Legal cases against the municipality due Loss of infrastructure and human lives due disaster and accidents occurrence, since the infrastructure is not insured • Non functionality of disaster management center • Ecological degradation • Relationship with Tribal Authority (development not addressing the vision) • Unavailability of land for development • Food mouth disease • Lack of water

2.3. STRATEGIC OBJECTIVES

The MSA of 32, 2000, chapter 5, requires that municipalities to develop strategic objectives that are realistic and measurable. Strategic objectives states what the municipality needs to achieve in relation to each National Key Performance Area and to ensure that National priorities and Municipal vision are realized.

Table 42: Revised strategic objectives.

KPA's	CONFIRMED STRATEGIC OBJECTIVES 2022/23
1. Spatial Rational	To develop an effective spatial framework that promotes integrated and sustainable development
2. Institutional Development and Transformation	To develop and retain the best human capital, effective and efficient administrative and operational support systems
3. Infrastructure Development and Basic service Delivery	To develop sustainable infrastructure networks which promotes economic growth and improve quality of life
4. Local Economic Development	To create an enabling environment for sustainable economic growth
5. Financial Viability	To improve financial management systems to enhance revenue base
6. Good Governance and Public Participation	To develop governance structures and systems that will ensure effective public consultation and organizational discipline

2.4. STRATEGIES 2022/2023/24/25//26

Table 43: Strategies:

KPA 1: SPATIAL RATIONAL					
STRATEGIC OBJECTIVE: To develop an effective spatial framework that promotes integrated and sustainable development					
KPI	CHALLENGES	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
LUMS ,SDF and SPLUMA	Lack of compliance with LUMS by stakeholders	Facilitate the implementation of SPLUMA Facilitation the implementation of SDF and LUS by 2022/23	ST to LG	Traditional Leaders, Council, strategic planning department, DRDLR	GGM ,DLG&H
Land Use Management	Mushrooming of informal settlements	Coordinate Land summit 2022/23		Traditional leaders, GGM, COGSTA, DRDLR, DPW, HDA, SAPS	GGM HDA
	Unstructured development	Establishment of a permanent structure to deal with traditional land issues Formalize and relocation of illegal occupation of land			
	No development and growth of the town	Identification of land claimed and resolved, report to EXCO by 2022/23			
Environmental management		ensuring a sustainable and habitable environment		GGM, MDM, Dept. of Environmental Affairs.	GGM &MDM

KPA 1: SPATIAL RATIONAL					
STRATEGIC OBJECTIVE: To develop an effective spatial framework that promotes integrated and sustainable development					
KPI	CHALLENGES	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
		2022/23 by implement legislation			
Intergrated human settlement		Ensure the provision of sustainable human settlement for the municipality	SH to LT	DHSWS	DHSWS

KPA 2: INSTITUTIONAL DEVELOPMENT AND TRANSFORMATION					
STRATEGIC OBJECTIVE: To develop and retain the best human capital, effective and efficient administrative and operational support systems					
KPI	CHALLENGES	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
IDP		To develop a credible IDP by ensuring compliance with the MFMA and comments from MEC of COGHSTA	SH to LT	Council, Community and Rep-forums	GGM
PMS		To develop an adequate PMS by cascading the system to lower level to establish some level of responsibility and accountability	SH to LT	Council, Managers and Community	GGM
Capacity building		Building capacity through skills development and adequate administrative systems on an ongoing process.	SH to LT	SDF; ; LGSETA; DBSA; NATIONAL TREASURY; TRAINING COMMITTEE; EMPLOYEES;EMPLOYER;DEPT OF LABOUR;TRADE UNION.	INTERNAL/OWN REVENUE; EXTERNAL FUNDING
KPA 2: INSTITUTIONAL DEVELOPMENT AND TRANSFORMATION					
STRATEGIC OBJECTIVE: To develop and retain the best human capital, effective and efficient administrative and operational support systems					

KPA 2: INSTITUTIONAL DEVELOPMENT AND TRANSFORMATION					
STRATEGIC OBJECTIVE: To develop and retain the best human capital, effective and efficient administrative and operational support systems					
KPI	CHALLENGES	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
KPI		STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
PMS		Develop a an effective, efficient and accountable work force through a credible PMS by 2022/23 June	SH to LT	Employer, employee, trade unions	OWN FUNDING
Legislative compliance		Ensure legislative compliance through enforcement of by laws and policies on an on-going bases	SH to LT	Employer, employee, trade unions	GGM
Organization structure		Filling of Strategic positions to ensure that the municipality realize its vision	SH to LT	All directors	GGM
Report Submissions		Establish mechanism of monitoring submission of reports by integrating the function into the PMS.	SH to LT	All directors	GGM
Contract Management		Centralization of contract management in the SCM unit with consultation with legal office.	SH to LT	All directors	GGM
Occupational health		Capacitating the OHS unit to ensure compliance with Safety regulations in the municipality both internal and external	SH to LT	Contractors and all employees	GGM
Job Evaluation		Proper evaluation and placement of personnel through development of policy and consultation with all relevant structures	SH to LT	All employees and unions	GGM

KPA 2: INSTITUTIONAL DEVELOPMENT AND TRANSFORMATION					
STRATEGIC OBJECTIVE: To develop and retain the best human capital, effective and efficient administrative and operational support systems					
KPI	CHALLENGES	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
Equity		The review the equity plan to ensure compliance with National legislation	SH to LT	All employees and cllrs	GGM
KPA 2: INSTITUTIONAL DEVELOPMENT AND TRANSFORMATION					
STRATEGIC OBJECTIVE: To develop and retain the best human capital, effective and efficient administrative and operational support systems					
KPI		STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
IT Development		Create a conducive working environment through an integrated system, effective and efficient ICT and security systems.	SH to LT	All employees and cllrs	GGM
Corporate Discipline		Establish an electronic logging system to manage availability of employees at their work stations	SH to LT	All employees and cllrs	GGM
expenditure reduction		Develop a monitoring tool for fuel consumption of fleet	SH to LT	All directors	GGM
Record Management		Establish an adequate record management system by ensuring compliance with the record management framework and introducing effective and efficient tools.	SH to LT	Director Corporate services.	GGM

KPA 3: INFRASTRUCTURE DEVELOPMENT AND BASIC SERVICES				
STRATEGIC OBJECTIVE: To develop sustainable infrastructure networks which promotes economic growth and improve quality of life				
KPI	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
Data Updating - GIS	Ensure the full operation of the GIS Unit by 2022/23	SH to LT	OTP, GGM, MDM DLGH	Own Funding-GGM, External Funders
Water (MDM)	Ensure the implementation of the WSP functions	SH to LT	MDM, DWA,	MDM, DWA
Electricity	Ensure effective coordination for provision of basic and bulk services to communities to improve the livelihoods as an when required Mobilize funding for electrification of village extensions through DBSA Grant Establishment of a municipal entity to explore on acquiring an electricity license	SH to LT	Department of Energy	DOE
Electricity	Maintenance and upgrading of electricity assets of the municipality	SH to LT	ESKOM and DOE	DOE
KPA 3: INFRASTRUCTURE DEVELOPMENT AND BASIC SERVICES				
STRATEGIC OBJECTIVE: To develop sustainable infrastructure networks which promotes economic growth and improve quality of life				
KPI	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
Sanitation	Ensure the implementation of the WSP functions	SH to LT	MDM DHS	DHS
Sustainable water and sanitation	Ensure the provision of sustainable water and sanitation services	SHto LT	MDM,DHS	DHSWS
Maintenance, upgrading and extending water and sanitation services	To facilitate and ensure the expansion and upgrading of water and sanitation services to all communities	SH to LT	MDM,DHSWS	DHSWS

Roads	Develop a road infrastructure with storm water that will support economic development and improve the life of our people by 2022/23 Ensure regulation to control temporary street closure (damaging of the streets by tents)	SH to LT	Dept of Roads and Transport, MDM, RAL, GGM	Roads and Transport, MDM, RAL, GGM
Storm Water Drainage	Ensure continuous operations and maintenance of the storm water drainage system to ensure functionality	SH to LT	Director Technical services	GGM
KPA 3: INFRASTRUCTURE DEVELOPMENT AND BASIC SERVICES				
STRATEGIC OBJECTIVE: To develop sustainable infrastructure networks which promotes economic growth and improve quality of life				
KPI	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
Refuse Removal	Improve the livelihood of the community by establishing an environmentally compliant system.	SH to LT	GGM, DEA	GGM
	Ensure extension of the refusal removal in surrounding villages by 2022/23			
Provision of free basic services	Improve the livelihoods of our community through grant compensation	SH to LT	GGM	GGM
Basic Services	Improve the livelihoods of our community through development of adequate infrastructure reticulation and effective maintenance	SH to LT	GGM, MDM	GGM

Community facilities	Develop a healthy society through provision of well-maintained community facilities (on-going) on an on-going basis	SH to LT	All directors	GGM
KPA 3: INFRASTRUCTURE DEVELOPMENT AND BASIC SERVICES				
STRATEGIC OBJECTIVE: To develop sustainable infrastructure networks which promotes economic growth and improve quality of life				
KPI	REVIEWED	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
Sport facilities	Ensure review of the tariff structure for hiring of the public facilities to ensure that there is maximum use Ensure continuous routine maintenance of the public facilities to ensure maximum utilization Ensure deployment of personnel to safeguard facilities against vandalism	SH to LT		GGM
Education	Facilitate sound engagement between the department and all relevant stakeholders to provide sustainable education facilities	SH to LT	DOE	NT DOE
Health services	Ensure the provision of health infrastructure and programess	SH to LT	DoH	DoH
Libraries	Develop a knowledgeable society through provision of well-maintained community facilities and access to developmental resources on an on-going basis	SH to LT	Director community development	GGM
Cemeteries	Restore dignity within our communities through ensuring that burial site are accessible	SH to LT	GGM	GGM
Environment	Ensure that we have a clean environment through enforcement of by-laws and policies		GGM and LEDET	GGM
Public Transport and safety	improve the livelihoods of communities by Developing a public transport management system to ensure access to economic/ employment bases and community facilities and safety facilities	SH to LT	GGM and DEPT of safety and security	GGM

KPA 3: INFRASTRUCTURE DEVELOPMENT AND BASIC SERVICES				
STRATEGIC OBJECTIVE: To develop sustainable infrastructure networks which promotes economic growth and improve quality of life				
KPI	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
Disaster Management	Implementation of the DM strategy			
Waste management (Landfill sites: disposal)	Improve the livelihood of the community by establishing an environmentally compliant system and a habitable environment.	SH to LT	MDM,COGSTA and GGM	Community Services
Traffic Control and Licensing	Ensure compliance and safety of our road users at all times offering an accessible and efficient licensing services and equipping traffic control officers with relevant resources.	SH toLT	GGM	Community services

KPA 4: LOCAL ECONOMIC DEVELOPMENT				
STRATEGIC OBJECTIVE: To create an enabling environment for sustainable economic growth				
KPI	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
LED Framework	To develop a framework that will assist the municipality in strategic LED planning 2022/23	SH to LT	Planning and LED	GGM
LED conceptualization	To continuously generate a proper understanding of the LED concept within the institution.	SH to LT	All employees and politicians	GGM

SMME Development	To continuously mobilize funding by identifying potential funders through the LED strategy	SH to LT	The Mayor, MM, planning and development	GGM , LEDET and DEA
Promotion of PPP and community partnership	Ensure the establishment of PPP with community stakeholders and government	SH to LT	Planning and development	
Investment attraction	Development of Business Investment and retention strategy	SH to LT	Planning and development	
Revenue enhancement	Business center established	SH to LT	Planning and development	
Sector Development	Continuously Create a conducive environment for Sector development through revitalization of sector forums by	SH to LT	Planning and development	GGM
Marketing	Place a GGM on a competitive market position through a strategic marketing strategy by 2022/23	SH to LT	Mayor, MM, Planning and development	GGM, LEDET and DEA
KPA 5: FINANCIAL VIABILITY				
STRATEGIC OBJECTIVE: To improve financial management systems and to enhance revenue base				
KPI	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
Revenue enhancement	Review Enhance municipal revenue through implementation of revenue enhancement strategies by 2022/23	SH to LT	All politicians and all directors	GGM
Legislative Compliance	Implementation of systems and policies framework by 2022/23	SH to LT	Finance	GGM

Debt reduction	To decrease the escalation of debt through effective implementation of the credit control policy by 2022/23	SH to LT	Finance	GGM
SCM	To ensure effective and efficient SCM processes through implementation of SCM policies and regulations on an on-going basis Development of procurement plans within the SDBIP.	SH to LT	Finance and all directors	GGM
Asset	Development of a credible asset register that is GRAP compliant twice a year	SH to LT	Finance	GGM
Expenditure	Record Management Payment of suppliers within 30days	SH to LT	Finance	GGM
Budget and Reporting	Budget, IDP and SDBIP alignment	SH to LT	Finance	GGM
Financial Systems	Development of integrated financial management system		Finance	GGM
Capacity building	To improve functionality of BTO through well capacitated personnel by July 2022/23	SH to LT	Finance & Corporate Services	GGM
Audit	To ensure that the municipality attains a clean audit report by 2022/23 by developing an audit recovery plan and report on quarterly bases.	SH to LT	Audit office and all directors	GGM
Risk management	Create a minimal risk environment through development and implementation of risk management strategy by 2021/22	SH to LT	All directors	GGM

KPA 6: GOOD GOVERNANCE AND PUBLIC PARTICIPATION				
STRATEGIC OBJECTIVE: To develop governance structures and systems that will ensure effective public consultation and organizational discipline				
KPI	STRATEGY	Short(ST)/Long term (LT)	STAKEHOLDERS	SOURCES OF FUNDING
Administrative Support to political structures	To increase administrative support to political structures by providing additional of human capital	SH to LT	Corporate Services	GGM
Functionality of political structures	Ensuring the functionality of council committees by utilizing the CoGHSTA performance monitoring tool	SH to LT	Corporate services and political bearers	GGM
Public Participation	Maximize understanding between the municipality and communities through effective consultation and information sharing, which will as a result involve all stakeholders in the decision making process 2022/23 (Strategy and policy)	SH to LT	Corporate Services, Strategic planning, political bearers	GGM
Communication	Enhance communication through the establishment of communication unit and review of communication strategy	SH to LT	All employees and cllrs	GGM
Support of Special groups	Support and Development of Special groups (gender, disability, elderly age, children and traditional support, HIV/AIDS, Youth)	SH to LT	All employees and cllrs	GGM

3. PROJECT DEVELOPMENT PHASE PER KPA

The Project Development phase outlines all projects that are addressing all challenges identified in the analysis phase and are also emanating from the needs identified during IDP public participation.

Projects are also developed in a way that the municipality takes advantage of the strength and opportunities and addresses the threats and weaknesses.

Project Development involves the crafting of a project, project costing, identification of beneficiaries, identification of sources of funding and ensuring that the projects are informed by specific strategies.

Project prioritization is guided by available funds, the need mostly raised by communities, municipal competency and the nature of a need, e.g if a need is basic, such as water, sanitation and electricity. The projects must also address National priorities.

3.1. Final projects and budget allocation

3.1.1 Table 44: Summary of Total Budget

Budget items	Total Budget: 2020/21	Total Budget; 2021/22	Total Budget; 2022/23
Total proposed budget	R 596,756,742	R615,679.148	R697,905,921
Operational Budget	R422 044,330	R420,946,738	R489,171,692
Capital Assets (Acquisition)	R17,950,000	R15,900,000	R17,550,00
Programmers	R28,772,000	R32,420.000	R32,728,000
Capital project budget	R136,245,206	R143,138,004	R176,006,228

1. SERVICE DELIVERY IMPLEMENTATION PLAN (OPMS)

The annual operational plan of the municipality is in relation to the budget of the current financial year. The MSA 32 of 2000 require all municipalities to develop a Performance Management System. MFMA 56 of 2003 Service Delivery Implementation Plan. The SDBIP is an element within the performance management system. It is a performance plan that indicates how and when all projects and programs in the IDP will be implemented throughout the year.

The process of development of this plan is guided by the financial performance and capacity of the municipality.

The prioritization of projects and programs is influenced by the following

- The availability of budget and skills
- Municipal powers and functions
- The vision

- The nature of the need raised by communities in relation to National priorities and constitutional requirements, e.g provision of basic services to all citizens.

The SDBIP/ performance plan includes only those that have financial and human resource support.

This chapter is concluded with the adoption of the Budget 2022/23.

4. INTEGRATION PHASE

The integration phase indicates of all sector plans that supports the IDP. It is expected of all sector plans to be aligned with all provincial and National plans. The following are existing sector plans within the municipality.

- **Land Use Management Schemes (LUS)**

The Scheme has been developed within the framework of the Development Facilitation Act, Spatial Development Framework, Development and Planning Act, the Municipal Systems Act, National Environmental Management Act, and may more as outlined in the Scheme.

The Land Use Management Scheme is an interim scheme. The Scheme Outlines land uses and zoning of land parcels. However the Scheme has further indicated challenges within proclaimed land that has not being developed as per the scheme. It further illustrates spatial challenges as indicated in Chapter

1

- **Housing Chapter**

The Housing Chapter indicates that type of Households and type structure within the municipality. It indicates that RDP houses are mostly in rural areas that in remote areas from the town. The low cost houses (RDPs) do not have basic service such as sanitation and water, but have at least electricity. Other Housing structures within the villages are mud houses which have poses a great risk to families. Generally type of structures in villages is Mud houses with thatch roof, brick and cement.

Informal settlements are dominated by tin houses. Type of structures in the township and suburb (Kremertart) are mostly brick and cement with basic services. The households also benefit from refuse removal services unlike villages were dumping is dumped and burned within the yard or disposed illegally on public spaces.

- **Local Economic Development Strategy (LED)**

The LED strategy looks into the development of the first and the second economy. It provides an in-depth analysis of economic sectors and challenges thereof. The strategy clearly indicates that the administrative sector is competitive, and that the economic tress Index is 50%, which means that municipality is not dependent on one single sector. It indicates that over the years agricultural sector was highly supported and also provided employment to most communities.

The economic activity that mostly takes place in Greater Giyani both formal/informal are: small-scale agriculture (maize, vegetables, tomatoes, beef), services, transport and retail development. There are however, a number of factors impacting negatively on the economic growth such as geographical location (distance to markets), shortage of skills, poor infrastructure, climatic conditions and diseases (HIV & Malaria). The municipality has potential for tourism and conservation development due to the existing natural heritage sites through the area, mining, abandoned farming schemes, processing of natural products (Mopani Worm and Marula Fruits)

- **Spatial Development Framework(reviewed)**

The SDF displays the space character, indicates how land has been and currently being utilized. The SDF of GGM covers all areas within municipal boundaries as per the demarcation board. Among other issues, it has indicated issues such as encroachment of development and informal settlement of sensitive areas, development or illegal extension beyond erf boundaries mostly in the CBD,

The SDF is not detailed on geological matters which poses an environmental risk. The SDF displays strategic road network, land and Corridors for development.

The land which is situated north of R81 road from Giyani to Polokwane is strategically located for residential purposes in line with government objective of creating sustainable integrated human settlement. The land will accommodate high, medium and low income earners as per map three below.

The land which is situated adjacent to the CBD is strategically located for both residential and business purposes and we are in the process of developing the infrastructure master plan that will assist the municipality to develop the land. Currently negotiations are going on between the municipality and traditional leaders for them to release land which is suitable for development.(see the attached map 3 below)

The municipality has earmarked the land which is situated east of the R81 road to Polokwane and north of the R71 road to Tzaneen next to area commissioner's office for business development as per our spatial development framework.(see the attached map 3 below.)

Strategic Land of industrial development is located along R81 to Malamulele with envisaged growth to be towards the west. The area is ideal since it is not within environmental sensitive areas such as water bodies and minerals

- **Environmental Management Plan**

The Environmental plan of the municipality has given a in depth analysis of environmental status of the municipality and has further went to recommend environmental programmed that will enhance and protect the environment. It further developed strategies that were influence by the following environmental challenges:

Overgrazing is another environmental problem that is rife in the Greater Giyani Municipality. The contributing factor is the unscientific stock farming which at the end exert pressure on the grazing land.

Informal settlements have major negative effect on the environment in that whenever it occurs natural vegetation is destroyed worsening problems such as deforestation, soil erosion, water and air pollution e.g. Hluphekani in the eastern part of Giyani Town. The major causes of informal settlements are influx of people from villages to the town due to poverty, unemployment, population growth and urbanization.

Soil erosion is a problem in Greater Giyani Municipal area especially around rural villages. The major causes of soil erosion are veld and forest fires, deforestation, overgrazing and poor land use planning and management.

Veld and forest fires are experienced in the whole Greater Giyani Municipality. The magnitude of the problem is severe. The major causes of this problem is poaching, firewood collection, uncontrolled burning of forests. Veld fires are prevalent in winter or early summer and affected areas includes grazing land and Man'ombe Nature Reserve.

Deforestation affects most of the Greater Giyani Municipal area. People who are firewood collectors, farmers, villagers, traditional healers, and herbalists aggravate the problem. The problem of deforestation is worse around major route and villages.

Water pollution in the Greater Giyani Municipality is a serious problem. Water is polluted by littering and the overflow of sewage, creating serious health problems for people who depend on water from rivers and streams. Informal businesses conducted alongside the road to Moeketsi – Malamulele, worsen the problem by illegally dumping in the Klein Letaba River.

Air pollution is an environmental problem that affects mainly the Giyani Town due to the concentration of vehicles and small industries.

- **PMS framework Policy**

The PMS Policy guides the development and Implementation of the Performance Management System of the municipality. It indicates legislative framework, stakeholders and their roles and responsibilities, it further outline segregation of duties in relation to the process.

The Performance Management System currently addresses the organizational performance and performance assessment of s57 managers. The system has not yet cascaded to lower levels.

The Policy is developed within the following framework

Municipal Finance Management Act 56 of 2003 (MFMA), requires municipalities to develop serve Delivery Implementation Plan (SDBIP) and must be signed by the Mayor within 28days after the budget has been approved.

Municipal Systems Act 32 of 2000, requires municipalities to develop Performance management Plan that must be reviewed quarterly. The performance management plan must be aligned to the IDP and indicate measurable and realistic targets for each Key Performance Indicator.

Performance Regulations, 2006 for Managers reporting to the municipal manager and the municipal manger, outlines the process of the development of Performance agreements. The MFMA 56 2003, further requires that Section 56 manager and Municipal Manager must developed

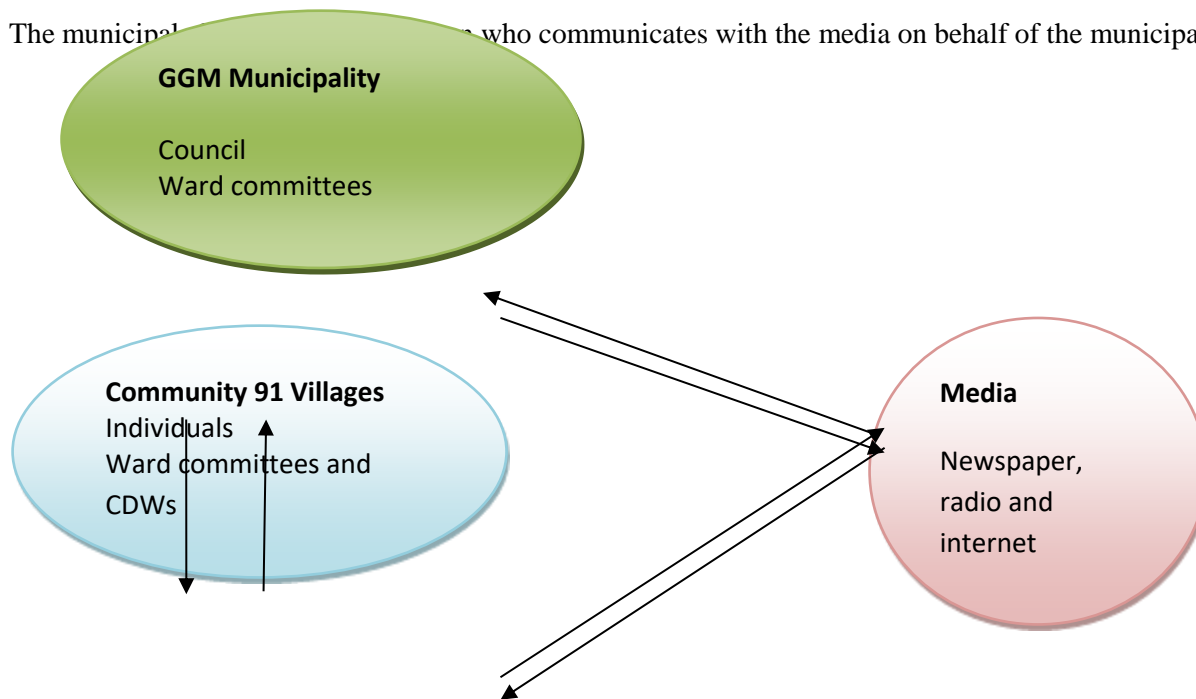

performance agreement that must be signed by the municipal manager and the Mayor, respectively. This Performance plans must be linked to the SDBIP, IDP and Budget.

- **Communication Strategy**

Communication Strategy outlines different structures of communication. It indicates protocol within those structure and as a result determining communication lines. The strategy is developed within a legislative framework such as the Municipal Systems Act and Municipal Structures Act.

The strategy looks into internal and external communication. It also indicates communication tools and media that the municipality should use. It outlines the administrative communication structure that also supports the political structure.

The municipal manager is the person who communicates with the media on behalf of the municipality. Brief communication structure is as follows:

Stakeholders within the strategy are 3. The Media and community are categorized as external stakeholders. The community makes inputs and has representatives sitting in internal stakeholder environment that participate in decision making process of the municipality. Communities are not restricted to communicate directly with media and with the municipality; however the municipality has a structured way of communication. Communication between the three stakeholders is a two-way process. Communication with other stakeholders is done for various reasons, such as advertising a public participation process, providing information to the community, advertising of posts or tenders and responding to community concerns, awareness campaigns.

- **Employment Equity Plan**

The Municipality has an equity plan approved by council at the moment the municipality is at 45% woman employment. The municipality is striving to employ women in managerial positions to close the gap that has existed many years back.

DISASTER MANAGEMENT PLAN

Greater Giyani Municipality faces a number of disaster risks. The most critical disaster risk that the municipality faces are the climate change related such as recurrent floods, persistent drought and extreme weather conditions, biological hazards which include communicable diseases outbreaks such as malaria and foot-and-mouth diseases. The municipality also faces a risk of environmental hazards such as land degradation and biodiversity loss.

Section 16(3) of the Disaster Management Amendment Act, 16 of 2015 stipulates that a local municipality must establish Capacity for the development and co-ordination of a disaster management plan and the implementation of a disaster Management function for the municipality which forms part of the approved disaster management plan.

To this end, Greater Giyani Municipality has developed a disaster management plan which guides all the disaster management activities as well as informs development planning within the Municipality. Furthermore, the municipality has established, and continues to develop, capacity to implement the disaster management function.

The following sector plans are outstanding

- Transport Master Plan
- Infrastructure Master Plan
- Water Demand Management and Conversation strategy.
- Environmental management plan
- Five year financial plan.

5. INSTITUTIONAL PLAN

This Chapter demonstrates organisational capacity in relation to human capital. This plan supports the operational plan as outlined in chapter 5. It demonstrates the capacity in place that will enable the municipality to realise its vision.

5.1. Institutional Challenges per KPAs

KPAs	Challenges	Additional Resources needed
------	------------	-----------------------------

<p>1. Spatial Rational</p>	<ul style="list-style-type: none"> • Unstructured Development • Lack of Land Use Management • Lack of Land Use Policies' application • Minimum participation by all stakeholders on land Use Matters and policies • Lack of compliance by stakeholders • Lack of Monitoring on land matters • Lack of alignment of SDF and LUMS 	<ul style="list-style-type: none"> • GIS and GIS specialist • Integrated Planning System (IT-GIS-Financial)
<p>2. Institutional Development and Transformation</p>	<ul style="list-style-type: none"> • Office space and IT resources not adequate to create an enabling environment. • Inadequate record Management Systems. • Inadequate security on other municipal buildings • Review of policies. • Lack of retention strategy. • Incomplete job evaluation process by SALGA • Lack of Individual Performance Management policy and systems 	<ul style="list-style-type: none"> • Integrated IT System • IT Master plan • IT equipment (laptops, printers, 3Gs) • IT Backup system and security system
<p>3. Infrastructure Development and Basic service Delivery</p>	<ul style="list-style-type: none"> • Inadequate and dilapidated infrastructure for water and sanitation • Inadequate storm water drainage • Shortage of water • Inadequate sanitation infrastructure, as a result contaminating underground water • Vandalism of community facilities • Inadequate animal pouding infrastructure and the unit is not fully functional • Lack of enforcement of by-laws • Town Planning Unit not fully functional. • Land use Scheme not applied • Illegal development and connection to services 	<ul style="list-style-type: none"> • Infrastructure Master plan

	<ul style="list-style-type: none"> • Inadequate road infrastructure • Sports facilities not fully utilized. • Invasion of proclaimed land and open spaces • SDF not adequate to assist environmental restrictions • Lack of security on municipal properties, such as boreholes • Lack of water conservation and demand management. 	
4. Local Economic Development	<ul style="list-style-type: none"> • Infrastructure development • Lack of Business investment, attraction, and retention strategies • Lack Value chain • Lack of enforcement of by-laws • Budget constraints • Lack of municipal property for economic development • Distance to the markets • Lack of land for development • Serious water shortages and drought • Brain drain 	<ul style="list-style-type: none"> • Financial muscle to develop road network supporting economic development
5. Financial Viability	<ul style="list-style-type: none"> • Low revenue base, • No cost recovery in rural settlements • Inadequate personnel to implement strategies. • Inadequate financial systems • Increasing debt accounts 	<ul style="list-style-type: none"> • Integrated financial System • Revenue enhancement strategy • Asset manager
6. Good Governance and Public Participation	<ul style="list-style-type: none"> • Minimal Participation by sector department 	<ul style="list-style-type: none"> • Maximum utilisation of CDWs

7 Conclusion

The IDP 2022/23 review process has enlightened the municipality on their strength weaknesses and identified threats and opportunities. Strategies were developed to ensure that the municipality take advantage of opportunities and address their weaknesses. There is also a need to improve in five Key Performance areas, and sustain Key Performance area, Good Governance and Public Participation. The municipality is addressing issues of Public Participation at a satisfactory level.

Challenges impacting on service delivery are mainly of financial viability (lack of revenue), and Institutional Development (lack of integration of HR systems with Financial Systems). However, strategies have also been developed to address challenges in all key performance areas. Projects that are developed emanated from the identified challenges and needs identified during public participation, strategic planning session and AG queries. It is evident that the performance of the municipality will continue to be challenged, among other factors, due to budgetary constraints. The municipal has not achieved their planned revenue collection in the past years and the revenue enhancement strategy has not been enforced due to lack of staff.

Nevertheless, the IDP 2022/23 demonstrates the municipality's endeavor to deliver services to their community despite the limited resources.

The municipality has also reviewed the organizational structure to ensure that it overcomes issues especially those that led Audit queries. The Budget and Treasury office has been capacitated with two managers and a position for Asset Manager has been established. A support Unit for Agriculture has also been established to ensure that the Agricultural Sector is strengthened and more jobs are created.

The Audit office has also made additional positions to ensure that the municipality complies with relevant legislation. The position for risk manager has also been established to assist manager to manage risks within their respective departments.

The IDP also demonstrates forward planning through the five year financial plan and long term strategies. Due to financial constraint the municipality has developed a five year project plan so as to ensure that there is continuity and gaps and backlogs are addressing accordingly.

The municipality will further developed on operational plan that outlines a one year implementation plan. Targets and Timeframes are set with in an operational plan, the SDBIP which will be monitored through a performance management system.

	<p>Mavhuza</p> <p>Phikela</p>	<ul style="list-style-type: none"> • Resuscitate boreholes • Paving of internal streets • Jobs • Paving of internal streets • Community Hall • Resuscitate the 2 dysfunctional boreholes • Provide road signs at Mavhuza and Phikela villages • Renovation of the sports center • Create jobs • Paving of internal streets and road from phikela to rivala • Community Hall • Culvert bridge to the cemetery • Reservoir • Visiting point • Electrify the extended village • Fund projects • RDP Houses • Water for the extended village
