- (2) GGM Supply Chain Management Policy

- (3) Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003, section 14,90 and 33 (MFMA)
- (4) Municipal Assets Transfer Regulation, 2008 (MATR)

- (7) Transvaal Local Government Ordinance 17 of 1939
- (8) Any other applicable legislation, regulation and policies that may govern the disposal, letting or transfer of ownership of municipal land and related activities that are not in contradiction with the primary legislation referred to above.

5. RESPONSIBILITIES

- (1) The department of Spatial Planning and Local Economic Development is the custodian of this policy. The director in conjunction with the relevant divisional heads shall be responsible for the implementation of the policy as well as the monitoring of adherence thereof. Said department is to be contacted for clarification of the content of the policy if such a need exists.
- (2) The afore-mentioned officials shall also be responsible for the revision of the policy, as and when required to ensure that the policy addresses the challenges it was designed to remedy.

6. SCOPE

- (1) The policy is applicable to all GGM owned immovable properties (including road reserves) and must be complied with in all instances where the letting of GGM owned immovable properties is concerned and including all existing leases in respect of GGM owned immovable properties. Example of leases covered by this policy are for land, building, outdoor, cell masts/telecommunication, airspace and any other immovable property belonging to council
- (2) The lease portfolio will consist of a variety of different types of leases based on both the usage and value of a particular asset as well as the term of the lease. Lease types are grouped into segments (see Section 9.2). The policy also includes an overall lease management framework (see Section 11) that will apply to all leases.

7. EXCLUSIONS

- (1) Section 14 of MFMA and the MATR apply to capital assets which are defined in the MATR to include immovable property, as well as certain moveable assets. This policy only applies to immovable property. In addition, the policy does not apply in the following instances.
- (2) Expense Lease Agreement;
- (3) Lease administration by the GGM human settlement Department; and
- (4) User agreement that are administered by the sport, recreation, arts and culture Department.

8. ALIGNMENT WITH PLANNING AND LED DEPARTMENT

- (1) The Planning and LED Department's mission is to facilitate, through GGM planning and LED portfolio, the sustainable generation of social, environment and economic returns for the municipal residents. As thought-leader the Planning and LED department is responsible for the end to end management of all GGM lease management practices. This policy will support this mission by defining and simplifying lease processes as well as providing a framework for the on-going management of leases, to maximise the returns to the municipality and its residents.
- (2) Since leases will be processed within the human settlement division of the Planning and LED department, all processes and frameworks of this policy inform the planning and LED strategy, structure and processes. The department must be able to execute processes in accordance with this policy.

9. SEGMENTATION OF LEASING PORTFOLIO

(1) Segmentation Criteria

- (a) Legislation implies important segmenting dimensions, some of which have been further divided to generate additional benefits for the municipality.
- (b) The term of the lease directly affects what processes have to be followed from both national and municipal legislative perspectives.
- (c) According to the MFMA, MATR, a long term lease is defined as a lease with a lease period that 3 years.
- (d) A long term lease of a high value asset (asset valued at or above R10 million) requires a public participation process. In addition, lease terms are a determinant of relevant delegations and also used for GRAP reporting on the municipal assets.
- (e) Segmenting lease by lease periods enables the municipality to forecast the future financial revenue for the municipality as well as conduct age analyses of the lease portfolio.
- (f) All lease must have definite terms in order to forecast the value of the contract in terms of GRAP asset reporting.
- (g) An upper limit of 30years will apply for all long term leases, and that may be subject to renewal.
- (h) The value of the leases asset is also a critical segmenting dimension insofar as it dictates, in conjunction with the lease period (see 1 above) whether or not a public participation process is required , as well as what delegations apply.
- (i) The asset value assists with the determination of market related rentals and therefore the valuation of the lease portfolio.
- (j) The value of the capital asset will be determined on a pro-rata basis in the event that the entire immovable asset i.e. immovable property in not let to a single tenant.

- (2) Usage: the municipal supply chain management regulations states that rental must be market related unless the lease is considered to be in the public interest, and the plight of the poor clause is invoked (i.e. the asset is used to fulfil a social purpose). This reference to usage in standing legislation does not go far enough in terms of segmenting the lease portfolio. Further dividing non-social use leases into 5 categories facilitates the qualitative analysis of the lease portfolio by usage of asset.

(3) Usage segmentation

Lease will be classified into the following usage segments:

- (a) Long term lease (lease longer than 3 years)
- (b) Development impact leases defined as:
 - (i) Any lease Agreement is excess of nine (9) years and eleven (11) months
 - (ii) Having an estimate value of the capital outlay for the development and related operations that represent a significant capital injection to GGM.
 - (iii) Containing a design concept that is aligned to the Growth and development Strategy, Spatial development frameworks and other GGM spatial environmental and economic plans, and
 - (iv) Leases anticipated to create a number of temporary and/or permanent jobs.
- (c) Outdoor or out-of-home advertising (predominantly but not limited to billboards, litter bins and street furniture)
- (d) Other commercial use (telecommunications, SMMEs, industrial, agricultural, etc.)
- (e) Social use (e.g. church grounds, crèches, NGOs, old age homes, cultural societies, sports and recreational facilities, federations/bodies/clubs etc.)

- (f) Private use (e.g. parking, gardening, security and includes encroachments into road reserves for the purposes of parking, security, landscaping). This type of agreement also includes lease agreements where consent is granted to a user in respect of remnants, small portions of land, sanitary or pedestrian lanes and properties which place maintenance burdens on GGM.
- (g) The above classification only serve as a guide and some segments may be consolidated or split.

10. THE RIGHTS TO USE, CONTROL OR MANAGE GGM OWNED IMMOVABLE ASSETS

- (1) General principles and guidelines pertaining to the letting by council of immovable property
 - (a) Where possible, council's immovable property should be managed as a sustainable resource by leveraging environmental, social and economic returns on such immovable property while council retains ownership thereof.
 - (b) Immovable properties that have been let shall be inspected at reasonable time periods to ensure compliance with the terms and conditions of the agreement of lease.
 - (c) Council reserve the right, where necessary immovable asset let, or a portion thereof, and to cancel an existing lease in its entirety where such immovable property is required for operational purposes, in pursuance of council's strategic objective or in the improvement established by him/her on a basis to be determined by a registered valuer, taking into account the remaining period of the lease agreement.

11. MUNICIPAL ASSET TRANSFER REGULATIONS (MATR)

- (a) Chapter 4 of the municipal asset transfer regulations (MATR) governs the granting of a right to use control or manage an immovable capital asset.
- (b) In terms of Regulation 34, only council of a municipality may grant an in-principle approval to grant the rights to use, control or manage an immovable capital asset if the lease period exceeds tree years and the value of the asset exceeds R10 million.
- (c) Regulation 34(4) of the MATR does however allow for council of a municipality to delegate its authority to grant an in-principle approval to the Accounting Officer i.e. the municipal manager in instances where:
 - (i) Property value is less than R10 million and the property rights exceeds 3 years
 - (ii) Property value is more than R10 million and the property rights does not exceeds 3 years
 - (iii) Property value is less than R10 million and the property rights does not exceeds 3 years
- (d) In terms of this policy, council is hereby delegating its authority to grant an approval to the accounting officer.

12. PUBLIC PARTICIPATION

- (a) Council is required to follow the provision of Section 79(10) and (18) of the local Government Ordinance, 17 of 1939, as well as the relevant regulations included in part 1 of chapter 4 of the MATR.
- (b) The relevant processes are more fully described in section 9.3 above.

13. METHODS OF AWARDING LEASES:

- (1) Once an in-principle decision has been obtained that the rights to use, control or manage a GGM owned immoveable asset may be granted, any of the following methods may be used to conclude a property transaction to ensure that the principles of fairness and transparency are given effect to:

(a) Bidding (tender/ auction process)

- (i) It is noteworthy that the MFMA does not regulate leasing of council-owned immovable property. However, leasing was later regulated by promulgation of the MATR.
- (ii) Although MFMA explicitly state that disposal of council-owned property must be competitive, the MATR do not make such a requirement in case of leasing.
- (iii) In the absence of such express requirement, it is imperative that GGM has a lease framework that embodies a transparent bidding process under some circumstances. This is to ensure fairness and transparency in land management. Bidding may either be by public tender or auction.

(b) Bidding process may be applicable where:

- (i) The property is required by more than one person, and/or
- (ii) The project is a mega or priority project and it is therefore

- (c) The nature of the competitive process is that a legally binding relationship is formed between the parties when council accepts a tender in writing. It is essential therefore, that key aspects of the lease are specified in the bid documents. The bid document may include a contract for sale/lease which could be completed with the bidder's details, the bidding price and be signed by the bidder. A binding legal agreement is created upon the acceptance in writing of a bid by the city.
- (d) Such a process may, depending on the nature of the transaction, include a one-stage, two stage or two-envelop bidding process (proposal call) in terms of which only those bidders that meet the pre-qualification criteria specified in the first stage are entitled to participate in the second stage.

14. OUTRIGHT LEASE/PRIVATE TREATY

- (h) Where the lease decides to construct permanent structure at his/her own will, the lessee must undertake to remove them at his own cost at the end of the lease, or where the structures are acceptable to GGM (at own discretion), ownership of such structures shall revert to GGM without reimbursement to the lessee.

15. UNSOLICITED BIDS (ONLY FOR MEGA/ HIGH VALUE PROJECTS)

The Director of Planning & LED shall be required to introduce an electronic model to determine the lease period.

16. PROCESS TO FOLLOW UNSOLICITED BIDS

- (1) If the Real Estate Department is of the view that the application meets the above framework requirements and therefore decides to consider an unsolicited bid, it shall do so in the following manner:

However, the lease agreement shall not be signed until Council (or a delegated official/committee) has approved in-principle that the land can be leased.
